

SAT Reading and Writing Questions

Converted from source PDF | Original filename preserved in output ZIP

Module 1

Question 1

Source PDF page: 1

The following text is from Mark Twain's 1876 novel *The Adventures of Tom Sawyer*. Tom, a child, has been told by his aunt to paint their house's fence. Tom appeared on the sidewalk with a bucket of whitewash and a long-handled brush. He surveyed the fence, and all gladness left him and a deep melancholy settled down upon his spirit. Thirty yards of board fence nine feet high. As used in the text, what does the word "surveyed" most nearly mean?

- A. Transformed
- B. Organized
- C. Examined
- D. Guaranteed

Question 2

Source PDF page: 1

The influence of William Shakespeare's writings is clear in a vast range of subsequent literary works and is similarly in many works in other media, from fine art (such as Edward Alcock's painting *Portia and Shylock*) to popular music (such as the musician Elvis Costello's song "Miss Macbeth"). Which choice completes the text with the most logical and precise word or phrase?

- A. subtle
- B. apparent
- C. unusual
- D. excessive_f

Question 3

Source PDF page: 2

The Apollo Moon landings (1969-1972) brought atmospheric sensors and soil sensors to the Moon and produced large amounts of data, much of which was stored on technologies that are now obsolete. A data-transfer project is working to these data so that the information is available to researcher Noah Petro, who is investigating the geology of the Moon. Which choice completes the text with the most logical and precise word or phrase?

- A. salvage
- B. improve
- C. amend
- D. simplify

Question 4

Source PDF page: 2

The following text is adapted from the 1895 poem "Ojistoh" by Emily Pauline Johnson, a Kanienkahagen (Mohawk) writer also known as Tekahionwake. I am Ojistoh, I am she, the wife Of him whose name breathes bravery and life And courage to the tribe who calls him chief. I am Ojistoh, his white star, and he is land, and lake, and sky-and soul to me. As used in the text, what does the word "breathes" most nearly mean?

- A. Rejects
 - B. Imparts
 - C. Absorbs
 - D. Acquiesces
- cy 5 Beka SEER URE |

Question 5

Source PDF page: 3

Mastering 'ajami, a Syrian art of creating intricately painted wood panels, demands a skill set that innate talent: crafting the panels requires not just the ability to draw but also an understanding of traditional techniques, materials, and design elements, necessitating expertise gained through dedicated guidance from experienced artisans. Which choice completes the text with the most logical and precise word or phrase?

- A. restrains
- B. replicates
- C. characterizes
- D. transcends

Question 6

Source PDF page: 3

In factories, humans and robots often work together. A research team ran an experiment to find out how working with robots affects relationships between human coworkers. The experiment included teams working together to make electric motor parts. One type of team included only humans and the other type included both humans and robots. Participants were paid for their work and were asked about their willingness to share their earnings with their human teammates. (This September SAT real test paper has been compiled by the HDF institution.) Participants from teams with robots were more likely to share with each other than participants from teams with only humans were. Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It states the results of the experiment discussed in the text.
- B. It indicates the question that the study discussed in the text was meant to answer.
- C. It explains an important part of the design of the experiment discussed in the text.
- D. It illustrates a problem that inspired the study discussed in the text.

Question 7

Source PDF page: 4

Steve Carter's award-winning play *Eden* was produced in 1976 by the groundbreaking Negro Ensemble Company (NEC). NEC cofounder Douglas Turner Ward, who worked as an actor, director, and playwright, had met actor and producer Robert Hooks while they were performing in a 1960 touring production of Lorraine Hansberry's play *A Raisin in the Sun*. Together, they envisioned a theater company that would nurture and showcase the work of Black theater professionals. Since NEC's founding in 1967, its workshops and performances have given Black playwrights, including Carter, a forum for their compelling stories. Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It illustrates the widespread influence of a play discussed earlier in the text.
- B. It provides additional information about a person mentioned in the text.
- C. It emphasizes the ongoing significance of the theater company discussed in the text.
- D. It explains the circumstances that led to the formation of the theater company discussed in the text. SEER |

Question 8

Source PDF page: 5

Despite potential independent confirmation, the apparent detection in 2020 of phosphine (PH₃)-a gas that on Earth almost exclusively derives from biological sources-in Venus's cloud deck remains controversial, in part because Venus is thought to be uninhabitable. To evaluate such a finding's plausibility, William Bains et al. modeled multiple abiotic PH₃ pathways, including geochemical, atmospheric, and photochemical reactions, but none adequately explain the observed levels of PH₃. If SAT preparation tips.) it would indicate insufficiencies in the current consensus on Venus's chemistry. Which choice best describes the overall structure of the text?

- A. It introduces an unexpected observation of a particular gas in Venus's atmosphere, presents an effort to investigate possible mechanisms that could explain that observation, and then notes an implication of that investigation's findings.
- B. It explains why the consensus view of a particular gas in Venus's atmosphere has recently become controversial, expands on a scientific team's reasons for questioning that consensus, and then suggests that future observations of Venus's atmosphere will likely be needed to settle the controversy.
- C. It compares the levels of a particular gas on Venus and Earth, sketches the chemical practical challenges of studying the presence of this gas on Venus more closely.
- D. It questions the effectiveness of the methods used to detect phosphine on Venus, proposes an alternative explanation for the data, and calls for a reevaluation of the planet's habitability. ce

Question 9

Source PDF page: 6

Given the immense scope of space, the search for extraterrestrial life is almost necessarily concentrated on the exoplanets deemed to have the most plausible chance of success—typically, atmosphere-bearing terrestrial planets orbiting within a certain range of their stars (termed the habitable zone). Claiming that Earth experienced a long transition from single-plate to plate tectonics that accelerated the emergence and evolution of complex organisms, researchers Robert J. Stern and Taras V. Gerya hold that consideration of tectonics, an often overlooked factor, could help further narrow the search for advanced extraterrestrial species.

Based on the text, what do Stern and Gerya most likely believe about the development of complex life on exoplanets?

- A. It is more likely to occur on habitable zone planets with atmospheres and plate tectonics than on otherwise similar planets that lack plate tectonics.
- B. It is more likely to occur if habitable zone planets with atmospheres transition from single-plate to plate tectonics late in their history than if they transition early in their history.
- C. It is probably more dependent on the presence of plate tectonics than on orbital distance from a host star or the presence of an atmosphere.
- D. It is unlikely unless the transition from single-plate to plate tectonics occurs before the acquisition of a lasting atmosphere.

Question 10

Source PDF page: 7

In what is now Washington state, the Tulalip Tribes operate the Hibel Cultural Center. Relying on traditional knowledge to guide the design of exhibits, this institution presents Tulalip history and culture to the tribes' citizens. The Turtle Mountain Band of Chippewa, a tribe in North Dakota, employs a similar strategy in its own cultural center. Both centers contrast with museums that aren't Indigenous-led; (For additional SAT study materials, contact sat_1600.) | when displaying Indigenous artifacts, such museums tend to anticipate mainly non-Indigenous audiences and rely on Euro-centric strategies for designing exhibits. Which choice best states the main idea of the text?

- A. When staging Indigenous exhibits, non-Indigenous institutions should follow the example of the cultural centers operated by the Tulalip Tribes and the Turtle Mountain
- B. and of Chippewa. B The cultural centers operated by the Tulalip Tribes and the Turtle Mountain Band of
- C. Chippewa differ in strategy from non-Indigenous museums that stage Indigenous exhibits. C Whereas non-Indigenous institutions stage exhibits on a wide array of subjects, the cultural centers operated by the Tulalip Tribes and the Turtle Mountain Band of Chippewa serve primarily to present Indigenous history and cultures.
- D. The strategy used by the Tulalip Tribes to present history and culture to tribal citizens differs only slightly from the strategy used by the Turtle Mountain Band of Chippewa in its cultural center. 10 Sere) etc

Question 11

Source PDF page: 8

The Wonderful Wizard of Oz is a 1900 novel by L. Frank Baum. In the novel, Dorothy, who is from Kansas, finds herself in an unfamiliar place called Oz. Kansas is presented as being less appealing than Oz, as is clear when . Which quotation from The Wonderful Wizard of Oz most effectively illustrates the claim?

- A. a character says to Dorothy, "I cannot understand why you should wish to leave this beautiful country and go back to the dry, gray place you call Kansas."
- B. a character says to others, "But it will take more than imagination to carry Dorothy back to Kansas, and I'm sure I don't know how it can be done."
- C. the narrator states, "Dorothy did not feel nearly so bad as you might think a little girl would who had been suddenly whisked away from her own country and set down in the midst of a strange land."
- D. the narrator states, "Before them was a great stretch of country having a floor as smooth and shining and white as the bottom of a big bowl."

Question 12

Average Hours Worked per Person per Year in 1950 and 2017 Country 1950 2017 Change in hours Percent change in hours Brazil 2,042 1,709 -333 -16%

- A.
- B.
- C.
- D.

Question 13

Source PDF page: 10

Percent Change in Average Global Market Prices by Commodity in Two Agricultural Trade-Reform Scenarios TFA scenario scenario Ratified in 2017 by two-thirds of World Trade Organization member nations, the Trade Facilitation Agreement (TFA) is a trade-reform measure that aims to reduce redundant customs procedures and other costly aspects of international trade. In a 2021 report, economist Jayson Beckman modeled global market prices of several agricultural commodities under both the TFA and an alternative trade-reform scenario: removal of agricultural tariffs (taxes on imports that generally increase prices on imported goods). After reviewing data from the report, a student concludes that overall, consumers of the commodities listed in the table would likely benefit more from the TFA than they would from tariff removal. Which choice most effectively uses data from the table to support the student's claim?

- A. Under the tariff-removal scenario, the average prices of processed foods, wheat, and fruits and vegetables would decrease by more than 1%, while the average price of rice would decrease by less than 1%.
- B. Under the tariff-removal scenario, the average price of processed foods would increase, but the average prices of wheat and rice would decrease.
- C. Under the TFA scenario, the average prices of all four commodities would decrease, whereas under the tariff-removal scenario, only the average price of processed foods would decrease.
- D. Under the TFA scenario, the average price of rice would decrease by a smaller amount than any of the other three commodities' prices would, whereas its average price would increase under the tariff-removal scenario. YH | set re ener eee cane

Source PDF page: 11

The Man-Made World: Or, Our Androcentric Culture is a 1911 nonfiction work by Charlotte Perkins Gilman. (Reach out to our assistant sat_800800 to receive more resources.) In the text, the author emphasizes the importance of cultivating individuals rather than comparing them: Which quotation from The Man-Made World: Or, Our Androcentric Culture most effectively illustrates the claim?

- A. "That every child on earth shall have right conditions to make the best growth possible to it; that every citizen, from birth to death, shall have a chance to learn all he or she can [absorb], to develop every power that is in them."
- B. "We do not sadly measure the cabbage-stalk by the corn-stalk, and praise the corn for getting ahead of the cabbage--nor incite the cabbage to [imitate] the corn. We nourish both, to its best growth-and are the richer."
- C. "We have but to learn the real elements in humanity; its true powers and natural characteristics."
- D. "We are now to consider the growth of the family in humanity." oe

Question 15

Source PDF page: 12

Zooarchaeologist Ophélie Lebrasseur and her team examined a fox skeleton discovered in 1991 at an archaeological site alongside artifacts of human habitation (like spear points) in central Argentina. Lebrasseur et al. determined that the fox was *Dusicyon avus*, an extinct species resembling a jackal, and radiocarbon dating placed the fox at the site at the same time as human inhabitants. (Indeed, the inhabitants may have deliberately buried the fox.) In addition, while wild foxes have a diet entirely made of meat, isotopic signatures of the skeleton's teeth indicated that the fox's diet, like that of the humans, was partly composed of plant material. Lebrasseur et al. therefore concluded that Which choice most logically completes the text?

- A. the humans who were alive at the same time as the fox most likely ate more meat than the fox did.
- B. the humans who were alive at the same time as the fox hunted using the spears whose points were also found at the site.
- C. the fox may have been a companion animal of the humans who inhabited the site at the same time.
- D. the fox had a diet more similar to that of jackals than to that of wild foxes.

Question 16

In the nineteenth century, Elizabeth Cady Stanton and Susan B. Anthony for women's right to vote in the United States. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. having campaigned
- B. campaigned
- C. campaigning
- D. to campaign , 15 Bere - SS wv |

Question 17

Source PDF page: 13

While conducting an interview for her book *Latina Authors and Their Muses*, editor Mayra Calvani asked Sarah Cortez, author of the memoir *Walking Home*, what Cortez's response was *Bury Me Deep* by Megan Abbott. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. her favorite book was.
- B. was her favorite book?
- C. her favorite book was?
- D. was her favorite book!

Question 18

Source PDF page: 13

the dance piece *Episodes*, which premiered at New York's City Center of Music and of Balanchine's neoclassical ballet and Graham's modern the stylistic diversity and creative innovation within the dance world. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. dance, it showcased
- B. dance. Which showcased
- C. dance, showcasing
- D. dance. Showcasing

Question 19

Source PDF page: 14

In the book *A Theory of Harmony* (1985), Swiss musicologist Ernst Levy argued that every chord has an opposite that can be substituted for it. For example, a pianist could replace the vi chord for the ii chord while chord is a given chord's opposite can be determined using a music visualization tool called the circle of fifths. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. improvising which
- B. improvising and which
- C. improvising. Which
- D. improvising, which

Question 20

Source PDF page: 14

In her *Siluetas* sculpture series, the Cuban American artist Ana Mendieta to access what she called an "omnipresent female force," utilized a variety of natural materials to create outlines-or silhouettes-of her own body. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. Mendieta was hoping
- B. Mendieta hoped
- C. Mendieta had hoped
- D. Mendieta, hoping : 17 Sire) SS vo oo | BBA SAT © BSSZSAARM oe eecee

Question 21

Source PDF page: 15

As volcanologists like Tamsin Mather are apt to make clear, not all volcanoes are the same. Tendirek in Turkey, for example, is a shield volcano, a type of volcano named for its low profile, resembling a warrior's shield lying on the ground. Opala in Russia, is a caldera, a large cauldron-like hollow that forms shortly after the emptying of a magma chamber in a volcanic eruption. Which choice completes the text with the most logical transition?

- A. in any case,
- B. in contrast,
- C. in conclusion,
- D. in fact,

Question 22

Source PDF page: 15

The United Nations' Trade and Development organization divides exports into five key categories: food items, agricultural materials, fuels, ores and raw metals, and manufactured goods (i.e., most nonfood goods made by machinery or by hand). In 2022, the majority (62 percent) of Belgium's exports were manufactured goods. vaccines, medicines, and cars were its top exports. Which choice completes the text with the most logical transition?

- A. In a broader sense,
- B. Within this category,
- C. In the future,
- D. Despite this majority,

Question 23

Source PDF page: 16

A research team led by Gal Badihi has discovered that chimpanzees communicate through exchanges of gestures occurring at a pace similar to that of human conversations. chimpanzee gesture exchanges have short pauses of about 120 milliseconds between communications, comparable to the 200-millisecond average pause between turns in human speech. Which choice completes the text with the most logical transition?

- A. Specifically,
- B. As a result,
- C. By contrast,
- D. Nevertheless,

Question 24

Source PDF page: 16

While researching a topic, a student has taken the following notes: @The Great Salt Lake in Utah is one of the world's saltiest bodies of water. @The northern portion of the lake has a higher concentration of salt than the southern portion. @Crustaceans called *Artemia franciscana* live in the southern portion. @Bacteria called *Nodularia* live in the southern portion. The student wants to emphasize a difference between *Artemia franciscana* and *Nodularia*. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. *Artemia franciscana* are crustaceans that live in the southern portion of the Great Salt Lake.
- B. *Artemia franciscana* and *Nodularia* both live in the Great Salt Lake's southern portion.
- C. The northern portion of the Great Salt Lake has a higher concentration of salt than does the southern portion.
- D. *Artemia franciscana* and *Nodularia* are different types of organisms: *Artemia franciscana* are crustaceans, whereas *Nodularia* are bacteria. 19 Sere) oo |

Question 25

Source PDF page: 17

While researching a topic, a student has taken the following notes: @Extravehicular activities (EVAs) are activities performed outside a spacecraft by astronauts in outer space. @EVAs are also known as spacewalks. (Reach sat_6688 in wechat to receive more resources.) @Richard Mastracchio is a former US astronaut who has performed 9 spacewalks. @The total time of Mastracchio's spacewalks was 53 hours and 4 minutes. @Garrett Reisman is a former US astronaut who has performed 3 spacewalks. @The total time of Reisman's spacewalks was 21 hours and 21 minutes. The student wants to emphasize a similarity between the astronauts Mastracchio and Reisman. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Reisman has spent less time performing spacewalks than Mastracchio has.
- B. EVAs, also known as spacewalks, are activities done by astronauts outside a spacecraft.
- C. Mastracchio and Reisman have each performed multiple spacewalks.
- D. Mastracchio has performed spacewalks, but Reisman has performed EVAs.

Question 26

Source PDF page: 18

While researching a topic, a student has taken the following notes: @The Tijuana Slough National Wildlife Refuge (NWR) is a protected natural area in California. @It encompasses 1,023 acres. @The Tijuana Slough NWR was established to safeguard the habitat of the light-footed clapper rail, an endangered species. @The Tijuana Slough NWR is managed by the US Fish & Wildlife Service. @The US Fish & Wildlife Service limits human activities in the area. The student wants to emphasize the role the US Fish & Wildlife Service plays in safeguarding the habitat of the light-footed clapper rail. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. By limiting human activities in the Tijuana Slough NWR, the US Fish & Wildlife Service safeguards the habitat of the light-footed clapper rail.
- B. Human activities are limited in the Tijuana Slough NWR, a protected natural area in
- C. alifornia. C Home to the light-footed clapper rail, the Tijuana Slough NWR is located in California, where it encompasses 1,023 acres.
- D. The 1,023-acre Tijuana Slough NWR was established to safeguard the habitat of the light-footed clapper rail, an endangered species. , 21 Bee - Sv |

Question 27

Source PDF page: 19

While researching a topic, a student has taken the following notes: @The cuneiform script is the earliest known set of symbols used for writing. @Sumerian was one of the first languages to be written using the cuneiform script. @Sumerian was a language in ancient Mesopotamia (present day Iraq). @Clay tablets with Sumerian writing have been found there. @Some of these tablets are almost 5,000 years old. The student wants to identify a language that was written using the cuneiform script. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Examples of Mesopotamian writing that are nearly 5,000 years old have been found.
- B. A language in ancient Mesopotamia used the cuneiform script for writing.
- C. Clay tablets with cuneiform script have been found in present-day Iraq.
- D. Sumerian, an ancient Mesopotamian language, was written using the cuneiform script.

Module 2

Question 1

Source PDF page: 20

Zygomorphic (bilaterally symmetric) flowers remain open and functional on average

- A.
- B.
- C.
- D.

Question 2

Source PDF page: 20

The following text is from Charles Dickens's 1861 novel *Great Expectations*. The narrator is taking a walk near his home on a damp morning. On every rail and gate, wet lay clammy, and the marsh mist was so thick, that the wooden finger on the post directing people to our village—a direction which they never accepted, for they never came there—was invisible to me until I was quite close under it. As used in the text, what does the word "accepted" most nearly mean?

- A. Shifted
- B. Approved
- C. Authorized
- D. Followed

Question 3

Source PDF page: 21

Analysis of preserved plants cataloged in the United States Virtual Herbarium indicates that rising temperatures correlate with earlier leaf production, but such specimens represent only brief moments in plants' overall development. This research with studies involving live plants would enable a fuller understanding of how these observed changes affect plant fitness. Which choice completes the text with the most logical and precise word or phrase?

- A. Foregrounding
- B. Categorizing
- C. Anticipating
- D. Complementing

Question 4

Source PDF page: 21

of Johannes Vermeer's genre paintings (scenes of everyday life) in that its subjects are set against a plain background instead of—as in *Woman with a Pearl Necklace*—a richly detailed one, the painting nonetheless many signature traits of Vermeer's art, including realistic rendering of natural light. Which choice completes the text with the most logical and precise word or phrase?

- A. evinces
- B. repudiates
- C. predates
- D. eschews

Question 5

Source PDF page: 22

Technological advances have prompted companies to increasingly rely on automation to streamline production. Armin Granulo and colleagues, however, found that for products with higher symbolic value (those viewed as contributing to individual SAT past papers and free mock exams.) consumers prefer products made by humans rather than by robots, likely because human-made products are more strongly associated with uniqueness. When considering automation, therefore, companies - especially those specializing in products of symbolic value-should weigh trade-offs between efficiency gains and consumer preferences. Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It refers to a finding presented in the previous sentence to recommend that companies that value product quality reconsider automating their production processes.
- B. It emphasizes that a research finding discussed in the text has practical implications that are particularly relevant for businesses making a certain class of product.
- C. It presents evidence supporting the text's argument that consumers prefer products with high symbolic value over products with low symbolic value.
- D. It illustrates the need for additional research to evaluate the claim in the previous sentence that automation affects how consumers see products.

Question 6

Source PDF page: 23

Text 1 To many artists in the mid-nineteenth-century United States, the American wilderness symbolized innocence and untouched beauty. So George Inness's decision to foreground a railroad in his 1855 painting The Lackawanna Valley is notable, since images of railroads often alluded to the destruction of wilderness in the name of subject of the railroad by painting a scene that suggests hopefulness rather than devastation. Text 2 It is impossible to deduce anything about George Inness's similarity to other painters of his time from The Lackawanna Valley. In fact, this painting is often used by scholars to highlight a key contrast: while many of his contemporaries avoided depicting industrial elements, Inness made the railroad a harmonious part of the landscape, showing his distinct artistic stance. Which choice best describes a difference in how the author of Text 1 and the author of Text 2 view the painting The Lackawanna Valley?

- A. The author of Text 1 implies that the styles and themes of the painting are atypical of Inness's body of work, whereas the author of Text 2 claims that the painting is representative of Inness as a painter.
- B. The author of Text 1 suggests that the painting can reveal information about Inness's opinions, whereas the author of Text 2 believes that the circumstances of the painting's production prohibit such an interpretation.
- C. The author of Text 1 claims that the painting is an accurate representation of a physical place, whereas the author of Text 2 identifies several embellishments that Inness made to alter the scene.
- D. The author of Text 1 emphasize the painting's similarities to the works of other painters at the time, whereas the author of Text 2 uses the painting to exemplify a contrast between Inness and some of his contemporaries , 26 Beka SRE UPR |

Question 7

Source PDF page: 24

The prints in *Images of Autonomous Matter*, part of a traveling exhibition of innovative Japanese art from the 1960s and 1970s, exemplify the interest in creating minimalist images of stark materials, such as steel, that first emerged among Japanese printmakers in the mid-to-late twentieth century. (This September SAT real test paper has been compiled by the HDF institution.) Mitsuo Kano's close-up of a serrated metal fragment, *Soldered Blue*, and Tatsuo Kawaguchi's image of a single corroded staple, which belongs to his *Relation-Quality* series, are two such works in the exhibit. In their emphasis on the innate qualities of manufactured materials, both prints push traditional boundaries for figurative art.

Which statement about the prints by Kano and Kawaguchi in *Images of Autonomous Matter* is best supported by the text?

- A. The portrayal of imperfection in the prints illustrates that the artists' goal was to disrupt the carefully curated nature of most art exhibitions.
- B. The objects depicted and the manner of depiction render the prints distinct from more conventional works of art.
- C. The prints showcase how different methods for printing images can offer unique perspectives on stark materials.
- D. The prints emulate the style of an earlier artistic movement that used simplistic compositions and featured industrial objects.

Question 8

Source PDF page: 25

Arturo Casadevall et al. have confirmed that twenty mushroom species (including *Marasmius capillaris* and species from the genus *Russula*) maintain subambient temperatures in both their fruiting bodies and their mycelium (the root-like hyphae from which the fruiting bodies grow), though the benefits of this hypothermic behavior are unclear. Noting that relative coldness was more pronounced in fruiting than in nonfruiting sites of the mycelium—a difference that persisted even after fruiting bodies were detached—the researchers speculate that thermoregulation in the mycelium may influence reproductive success. Which statement about the mycelium of the twenty mushroom species is best supported by the text?

A. The mycelium generally maintains temperatures lower than those of the fruiting bodies even when considering temperature variations between fruiting and nonfruiting sites.

B. The correlation between higher mycelium temperature and greater fruit productivity indicates that successful reproduction may be dependent on thermoregulation in the mycelium.

C. The presence or absence of fruiting bodies determines the temperature of the mycelium.

D. Temperatures in the fruiting areas of the mycelium are lower than in the nonfruiting areas due to differences in the depth and spread of the mycelium within soil or other organic matter.

- A.
- B.
- C.
- D.

Question 9

Source PDF page: 26

The following text is from William Carlos Williams's 1925 creative nonfiction book in the American Grain. Williams is discussing how works by nineteenth-century US poet and fiction writer Edgar Allan Poe were received by American readers. Poe must suffer by his originality. Invent that which is new, even if it be made of pine from your own yard, and there's none to know what you have done. It is because there's no name. This is the cause of Poe's lack of recognition. He was American. He was the astounding, inconceivable growth of his locality. Gape at him they did, and he at them in amazement. Afterward with mutual hatred; he in disgust, they in mistrust. It is only that which is under your nose that seems inexplicable. What does the text most strongly suggest about Poe's work and American readers?

- A. Poe's work was so innovative that there was not even terminology to describe it, which led American readers to regard both the work and Poe himself as strange but quintessentially American.
- B. Poe's work had few fans among American readers because it tended to present a negative image of American life and institutions
- C. American readers largely ignored Poe's work because its tone and subject matter were out of keeping with mainstream literature.
- D. American readers failed to appreciate Poe's work because of its novelty and the fact that it reflected aspects of the American character too ingrained in those readers for them to comprehend. cane

Question 10

Source PDF page: 27

Bird Species by Average Mass ee Average mass (kg) Capable of flight? Emperor penguin 104.0 Most bird species that are capable of flight weigh less than a kilogram (kg), which is not surprising considering the burden that extra body weight puts on a flying animal. But not all flying birds are so light, as we can see most clearly in the example of the Which choice most effectively uses data from the table to complete the example?

- A. common ostrich, which has a higher average mass than the emperor penguin.
- B. trumpeter swan, which has an average mass of 12.7 kg.
- C. common ostrich, which has an average mass of 104.0 kg.
- D. great bustard, which has an average mass below 10 kg. Ca ese ES |

Question 11

Source PDF page: 28

The 2002 production of *Z'm Not Rappaport* was the first Broadway show for which Teresa Snider-Stein was credited as a costume designer. Snider-Stein was among the Broadway costume designers interviewed by Sara Jablon-Roberts and Eulanda A. Sanders for their study of historical accuracy in costume design. They argue that aesthetics often outweigh fidelity to the past among designers for shows with historical settings. In a paper for a theater class, a student claims that the costume design for a modern production of Shakespeare's *A Midsummer Night's Dream* (set in ancient Greece) exemplifies this tendency. Which quotation from the costume designer for the modern production of *A Midsummer Night's Dream* would most effectively support the student's claim?

- A. "For *A Midsummer Night's Dream*, I decided not to include the extra fabric that would have been typical of clothing in the period because it made the costumes unappealingly bulky."
- B. "In trying to create the period look of *A Midsummer Night's Dream*, I had to make some practical compromises, such as substituting cooler modern fabrics for historically accurate woolsens so that the actors didn't overheat."
- C. "Although historically accurate costumes would have added an air of authenticity to *A Midsummer Night's Dream*, they have so many layers that costume changes would have been difficult."
- D. "Costumes must always reflect the correct historical period. Too often, I've seen costumes that borrow from a wide span of periods, resulting in a production with a confusing visual style." cee

Four European High-Speed Rail Hubs Po Country | ub type København H existing hub (urban) Lille Europe France peripheral replacement (urban periphery) Reggio Emilia AV | Italy distributed services (urban Mediopadana periphery) Stuttgart Hbf existing hub (urban)

Installing a new high-speed rail (HSR) hub in an area has the potential to boost residential development nearby, though the amount and type of development vary considerably by location. This potential is greatest when HSR hubs are established in more SAT preparation tips.) as these locations tend to have more available land for redevelopment into residential areas. Which statement is best supported by information from the text and table?

- A. The area around Lille Europe has greater potential for residential development than the area around Reggio Emilia AV Mediopadana does.
- B. The area around Lille Europe has greater potential for residential development than the area around København H does.
- C. The area around København H has greater potential for residential development than the area around Reggio Emilia AV Mediopadana does.
- D. The area around København H has greater potential for residential development than the area around Stuttgart Hbf does. 32 Sere) SEE RE EUR |

Question 13

Source PDF page: 30

In 2004, the US state of North Dakota enacted rate stability regulations (RSRs), constraining insurance companies' latitude to raise premiums (the periodic fees policyholders pay to maintain insurance policies) after policies are in effect. RSRs are effective at protecting existing policyholders from price volatility, but Naoki Aizawa and Ami Ko note that since dynamic pricing of premiums is an important risk-mitigation tool for insurers, RSRs may lead some insurers to scale back or entirely cease selling new policies in the affected market, thereby reducing the North Dakota's RSRs may Which choice most logically completes the text?

- A. be more advantageous for insurers than they are for either current or prospective policyholders.
- B. benefit policyholders at the expense of nonpolicyholders seeking to acquire policies.
- C. prevent large increases in premium prices for new policies despite leading to fewer insurers offering such policies in the affected market.
- D. reduce premium price volatility once policies are in effect but increase risks for policyholders. cee

Question 14

In an analysis of medieval urbanization in York, Bautzen, and other European settlements, researchers drew on modern urban scaling theory, which posits that population density in core urban areas increases as a city grows larger. Hypothesizing that this typical relationship would have differed in medieval settlements because of the constraining influence of strong hierarchical social structures (which are much less pronounced in modern cities) on social networking and economic integration- drivers of urban agglomeration-the team created a model that accounted for the presence of restrictive institutions. They found that the typically expected density-size relationship held for each of the 173 medieval settlements whose growth they analyzed, suggesting that Which choice most logically completes the text?

- A. the social and economic dynamics that affect urban agglomeration were likely much different in medieval settlements than in modern cities, despite the
- B. although there tends to be a positive relationship between population size and development of core urban areas for both medieval settlements and modern cities, social institutions likely limited the rate at which population density increased in medieval settlements.
- C. despite a change in the role of social structures over time, there is likely a notable consistency between medieval settlements and modern cities in underlying elements of the social and economic interactions among individuals that shape the development of core urban areas.
- D. the constraining influence of hierarchical medieval institutions likely had a significant effect on individuals in some social groupings but little to no effect on members of other social groupings. eee

While researching a topic, a student has taken the following notes: @ Researchers Gwangsu Kim et al. sought to explore the relationship between the brain's ability to process natural sounds and its ability to process music. @ They used an artificial deep neural network (DNN) that models how the brain processes auditory information. The DNN had been trained to detect natural sounds (excluding music). @ Finding: The DNN spontaneously developed neurons that responded to music but not to other auditory stimuli. @ Conclusion: The brain's ability to process music may arise as a by-product of natural sound processing. The student wants to present the aim of the study. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Using an artificial deep neural network the researchers sought to explore the relationship between the brain's ability to process natural sounds and its ability to process music.
- B. The researchers used an artificial deep neural network, which spontaneously developed neurons that responded to music but not to other auditory stimuli.
- C. By training an artificial deep neural network, the researchers aimed to establish that the brain's ability to process natural sounds arises as a by-product of processing music.
- D. In their study, the researchers evaluated whether an artificial deep neural network trained only on natural sounds would develop neurons that respond to music. cane
