Module 2

Question 1

Source PDF page: 1

The following text is adapted from Jhumpa Lahiri's 2003 novel *The Namesake*. Gogol is an elementary school student in Massachusetts. In art class, his favorite hour of the week, he carves his name with paper clips into the bottoms of clay cups and bowls. He pastes uncooked pasta to cardboard, and leaves his signature in fat brush strokes below paintings. ©2003 by Jhumpa Lahiri As used in the text, what does the word "carves" most nearly mean?

- A. Signs
- B. Boosts
- C. Chases
- D. Switches

Question 2

Source PDF page: 1

Fossils of ancient arthropods preserved in volcanic ash in Morocco have similarities between ancient arthropods and modern ones, such as spiders. Detailed 3D images of the fossils allowed scientists to see features that look like features found in arthropod species living today. Which choice completes the text with the most logical and precise word or phrase?

- A. questioned
- B. repaired
- C. protected
- D. revealed

Question 3

Source PDF page: 2

Smart watches and fitness trackers tend to rely on batteries that can't be easily taken out and swapped for new ones. Environmental policy researcher Carl Dalhammar warns that because these gadgets can't without working batteries, once the batteries stop working, the devices are typically disposed of as trash. Which choice completes the text with the most logical and precise word or phrase?

- A. expand
- B. separate
- C. function
- D. decide

Question 4

Source PDF page: 2

Otake Chikuha's 1902 piece *Fall of the Castle* is an important work of Nihonga, or traditional Japanese painting. To produce the piece, Otake used a centuries-old Japanese approach, (Add our assistant by using sat_1600 for more learning materials.) applying ink and watercolor to a silk surface. By contrast, Saeki YUz6 European methods, using oil on canvas to produce Western-style paintings. Which choice completes the text with the most logical and precise word or phrase?

- A. imagined
- B. punished
- C. employed
- D. overheard)DEFEN

Question 5

Source PDF page: 3

Home Video Game Systems of the 1970s and 1980s
System Manufacturer System type Approximate number of units sold worldwide
Game & Watch handheld 18,600,000
A student is writing a research paper on the global rise of the home video game industry during the 1970s and 1980s. The student is surprised by differences in the number of units sold by some systems compared to those sold by others. Most remarkably, the Which choice most effectively uses data from the table to complete the statement?

- A. IBM PC sold approximately 18,600,000 units, whereas the TurboGrafx-16 sold only approximately 1,900,000 units.
- B. IBM PC sold approximately 6,952,600 units. whereas the TurboGrafx-16 sold only approximately 2,650,000 units.
- C. Game & Watch sold approximately 18,600,000 units, whereas the Atari 400/800 sold only approximately 1,900,000 units.
- D. Game & Watch sold approximately 6,952,600 units, whereas the Atari 400/800 sold only approximately 2,650,000 units. (4 ' Eee \$\$\$ | B49} SAT © BS

Question 6

Source PDF page: 4

Blue holes, such as the Blue Hole of Gozo in the Maltese Islands, are large seawater sinkholes that tend to have varying water density and irregularities in their steep walls. In 2021, researchers studied the previously unexplored Taam Ja' Blue Hole (TJBH) in Chetumal Bay, Mexico; using echo sounder mapping, they determined its maximum depth to be about 274 meters. In the complex environments of blue holes, however, echo sounder mapping has limitations. So, in 2023, Teresa Alvarez-Legorreta and colleagues employed a conductivity, temperature, and depth (CTD) profiler to remeasure the depth of the TJBH. The profiler recorded depths around 420 meters but was unable to confirm detection of the bottom of the hole, suggesting that Which choice most logically completes the text?

- A. while the CTD profiler may be better suited than echo sounder mapping for measuring the depth of blue holes, another measurement approach is likely needed to ascertain the maximum depth of the TJBH.
- B. while the CTD profiler can discern the properties of underwater terrains more comprehensively than echo sounder mapping can, echo sounder mapping produces more accurate measurements at greater underwater depths.
- C. although the maximum depth of the TJBH has yet to be conclusively detected, the bottom of the hole is most likely between 274 and 420 meters below sea level.
- D. although both echo sounder mapping and the CTD profiler have known limitations, they produce reliable estimates of the depth of blue holes when used together.

Question 7

Source PDF page: 4

In 1941, college student Ann White an offer to train as a codebreaker for the US military, which was preparing for World War II. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. having received
- B. received
- C. to receive
- D. receiving

Question 8

Source PDF page: 5

When, on January 9, 1987, Kay A. Orr serving as the governor of Nebraska, she became the state's first female chief executive. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. has began
- B. begins
- C. began
- D. will begin

Question 9

Source PDF page: 5

Skeletal muscles are attached to bones. One bone, the humerus, has a skeletal muscle attached to called the brachialis. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. her
- B. them
- C. it
- D. him

Question 10

Source PDF page: 5

The impala (*Aepyceros melampus*) has a species population of about 2,000,000 less than that of the water buffalo (*Bubalus bubalis*), which has a species population of roughly 172,000,000. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. members: this amount is.
- B. members. This amount is:
- C. members; this amount is
- D. members, this amount is.

Question 11

Source PDF page: 6

According to Portuguese researcher Isabel C.F.R. Ferreira, the cinnamic acid found in button mushrooms can protect human cells from damage.(Unlock more SAT resources by adding our WeChat assistant at 13311268274.) the acid combats free radicals, a type of unstable molecule that can harm healthy cells in the human body. Which choice completes the text with the most logical transition?

- A. On the contrary,
- B. As a result,
- C. Specifically,
- D. Nevertheless,

Question 12

Source PDF page: 6

While researching a topic, a student has taken the following notes: @ The Zambezi River is 1,703 kilometers long. @ It is in Africa. @ It ranks No.32 among the longest rivers in the world. @ The Vistula River is 754 kilometers long. @ It is in Europe. @ It ranks No.133 among the longest rivers in the world. The student wants to indicate where the Zambezi River is located. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. The Vistula River is ranked No.133 among the longest rivers in the world
- B. The Zambezi River is 1,703 kilometers long.
- C. The Zambezi River is located in Africa.
- D. The Zambezi and Vistula rivers are among the longest rivers in the world.

Question 13

Source PDF page: 7

@® The Smolensk Planetarium in Smolensk, Russia, is home to a Foucault pendulum. @ The pendulum consists of a weighted ball that swings at the end of a roughly 12-meter-long cable. @ = Like all Foucault pendulums, it dangles from a fixed point that ensures the swing path of the pendulum doesn't change. @ To an observer, the swing path of a Foucault pendulum appears to change over time because Earth rotates beneath it. @ Foucault pendulums are used as a simple way to provide evidence of Earth's rotation. Which choice most effectively uses information from the given sentences to specify the length of the Foucault pendulum's cable?

- A. With a swing path that appears to change over time, a Foucault pendulum provides evidence of Earth's rotation.
- B. The Foucault pendulum at the Smolensk Planetarium consists of a weighted ball and a cable.
- C. Although the swing path of a Foucault pendulum doesn't actually change, it appears to change due to Earth rotating beneath the pendulum.
- D. The Foucault pendulum at the Smolensk Planetarium in Smolensk, Russia, includes a cable that is roughly 12 meters long. re
