Module 1

Question 1

Source PDF page: 1

Scholars of Mexican literature have focused their attention on writers of the fertile period following the Mexican Revolution (which lasted from 1910-1920), such as Laura Esquivel. These writers are often considered the leading figures of the Mexican literary canon, but nineteenth-century writers like Antonio Menendez de la Pefia are just as Mexican literature. Which choice completes the text with the most logical and precise word or phrase?

- A. overlooked in
- B. polarizing in
- C. essential to
- D. knowledgeable about

Question 2

Source PDF page: 1

City planners need accurate maps of their city's sidewalks to properly maintain them, training a computer program to identify sidewalks in aerial images of Boston. When they used the program on aerial images of Brooklyn, it accurately sidewalks and could even distinguish between concrete and brick. Which choice completes the text with the most logical and precise word or phrase?

- A. mistook
- B. approved
- C. detected
- D. Neglected)DEFEN ;

Question 3

Source PDF page: 2

Whereas researchers long thought the Congo rainforest constrained the initial expansion of Bantu-speaking peoples (which today include the Kuria in Tanzania and Batu communities managed to the rainforest, a feat facilitated by drier conditions that opened up viable corridors through the vegetation. Which choice completes the text with the most logical and precise word or phrase?

- A. traverse
- B. decimate
- C. circumvent
- D. preserve

Question 4

Source PDF page: 2

The extensive use of the costly pigment ultramarine in the paintings of Johannes Vermeer-creator of masterpieces such as *Woman with a Lute* (ca. 1662-1663)-was likely ___-s as much by the pigment's chemical durability as by its exclusiveness and vivid blue hue: relative to indigo and other blue pigments employed by Vermeer and his contemporaries, ultramarine is less susceptible to degradation. Which choice completes the text with the most logical and precise word or phrase?

- A. constrained
- B. motivated
- C. edited
- D. exempted / 4 Seer) eee

Question 5

Source PDF page: 3

What is a city? The answer depends on where you live Many countries define an area as a city based on how many people live there. However, not every country uses the same numbers. Denmark defines a city as an area with a population of at least 200, while Spain defines a city as having a minimum population of 10,000. Some countries even define cities using other factors, like the number of buildings in the area. Which choice best describes the overall structure of the text?

- A. It offers a recommendation, then provides reasons for that recommendation.
- B. It poses a question, then explains why the question has many answers.
- C. It lists the number of cities in one country, then compares that number to the number of cities in another country.
- D. It describes two locations, then explains why only one of the locations is considered a city.

Question 6

Source PDF page: 4

Editor Jared Shurin's 2023 anthology *The Big Book of Cyberpunk* contains 108 stories, an enormous number. The anthology has a vast chronological scope, including both James Tiptree Jr.'s "The Girl Who Was Plugged In"(1973) and Lavanya Lakshminarayan's "Etudes"(2020). (Gain access to more real past papers at www.hdfedu.com.) In his introduction, Shurin defines cyberpunk as a subgenre of speculative fiction concerning "the influence of technology on the scale, the pace, or the pattern of human affairs"; however, many critics have previously argued that cyberpunk is a literary movement that is not just idea driven but that has distinctive aesthetic components as well. Which choice best describes the function of the underlined portion in the text as a whole?

- A. It points out a characteristic that is shared by the work of Tiptree and Lakshminarayan.
- B. It explains one of several points of disagreement that an editor of a cyberpunk anthology has with a group of critics.
- C. It explains why some critics think that a particular anthology of cyberpunk stories should not be considered a finite summary of its genre.
- D. It suggests a way in which a particular editor's definition of cyberpunk may be considered incomplete. eee

Question 7

Source PDF page: 5

With its mournful subject matter and haunted tune, "Silver Dagger" is one of the most celebrated folk ballads of the southern

- A. ppalachian Mountains. Dolly Parton, who was born and raised in the region, was deeply influenced by these traditional ballads, as can be heard in the songs she wrote in the first decade of her career. "My
- B. lue Tears," a song from her 1971 album
- C. oat of Many Colors, echoes Appalachian ballads both in theme and word choice. Which choice best describes the function of the underlined sentence? A. It cites an album by
- D. olly as one of her most commercially successful works. C. It identifies a song by Dolly that was influenced by Appalachian music. D. It lists several Appalachian folk ballads that Dolly recorded early in her career.

Question 8

Source PDF page: 6

Harold Newton's *Yellow Day*, a wetland landscape with palm trees and lush greenery set against the pastel yellows and pinks of the sky and water, is typical of paintings by the mid-twentieth-century landscape artists now known as the Florida Highwaymen. Even though Florida was rapidly being developed at that time, tourists in particular held the idea that its distinctive tropical and coastal environments represented a pristine natural world, untouched by modernity. As with many Highwaymen paintings, the appeal of *Yellow Day* derived from its ability to capture this sentiment. Which choice best states the main idea of the text?

A,

- A. lthough many paintings by the Florida Highwaymen have subjects in common, *Yellow Day* is now more highly regarded by critics than other Florida Highwaymen paintings are.
- B. Although *Yellow Day* and other paintings by the Florida Highwaymen were originally celebrated for their depictions of Florida's natural environments, art historians now question these paintings' accuracy.
- C. Tourists to Florida in the mid-twentieth century were more likely to admire the
- D. *Yellow Day* and other paintings by the Florida Highwaymen were notable for their ability to appeal to a popular conception about the state of Florida in the mid-twentieth century.

Question 9

Source PDF page: 7

Mushrooms, including *Coprinellus micaceus* and species from the genus *Cantarellus*, are known to use the process of evapotranspiration to maintain internal temperatures below ambient temperatures. This thermorheic behavior is enhanced by the many thin gills (lamellae) on the fungus's caps, with substantial surface area contributing to capacity for evaporation. Examining fungal thermoregulation mechanisms, Radames Córdéro et al. determined that molds and yeasts also engage in evaporative cooling to facilitate hypothermia and suggest that, lacking features analogous to lamellae, these unicellular fungi aggregate into colonies to derive the benefit of greater surface area. Which choice best states the main idea of the text?

- A. Although a certain thermoregulation process has been observed in colonies of unicellular fungi, it has yet to be observed at the individual organism level.
- B. A recent analysis of specimens of *Coprinellus micaceus* and species from the genus *Cantarellus* substantiated the findings of earlier studies of thermoregulation mechanisms in several types of fungi.
- C. A study of a fungal thermoregulation mechanism determined that it is used more efficiently by molds and yeasts than by mushrooms and other multicellular fungi due to variances in colony size.
- D. Despite significant differences in their biological structures, mushrooms, molds, and yeasts have been observed to utilize the same thermoregulation process to achieve a particular effect. ey

Question 10

Source PDF page: 8

Pollination syndromes are suites of floral traits that have independently evolved as a flowers, for example, frequently exhibit yellow, red, or orange coloring. In a review of previous studies covering 417 plant species, Victor Rosas-Guerrero et al. concluded that the syndromes reliably predict angiosperms' most effective pollinators. However, in a response paper, Jeff Ollerton et al. note that Rosas-Guerrero et al. may have inadvertently ignored inconsistencies in how authors of previous studies evaluated floral traits. What does the text most strongly suggest about the study conducted by Rosas-Guerrero et al.?

- A. A limitation in the methodology used by the researchers may entail that the study's conclusion is not well supported.
- B. The approach selected by the researchers enabled them to sort through and remove obviously incomplete or inconsistent data before conducting their analysis.
- C. Because the study contained data on a limited number of plant species, its conclusion is accurate for those species but cannot be applied to species not in the study.
- D. Due to the difficulty of gathering representative research on angiosperms, the study may have included previous research with a focus too homogeneous to be comparable. eee

Question 11

Source PDF page: 9

Book lovers are often eager to watch movie versions of the books they admire. When Dr. Seuss's popular children's book *How the Grinch Stole Christmas* was turned into a movie in 2000, for example, fans of the book flocked to theaters to see the movie. Curious to know whether screen adaptations also inspire people to read the original books, Klaudia H.Y. Lee interviewed more than three thousand students. She found that many of the students indicated that they were more motivated to seek out and read certain books after having watched movies based on them. Which choice best states the main topic of the text?

- A. Books that have been adapted into movies
- B. Students hoping to become filmmakers
- C. Dr. Seuss's career as a writer
- D. Movies about people working in bookstores

Question 12

Sewing Technology Found at Pleistocene Sites, by Latitude Site Region Technology Years before | Latitude (° N) present (BP) KiayasCove | Sibaia | eyednestis | 25000 | 0 Yafteh Cave Southwest awls 40,000 33 iad ie During the Pleistocene, people began using sharpened bone awls to make holes in hide and fur, through which cord was then strung to make clothing. Eventually, people made needles by perforating the end of a bone awl with an eye (hole) to hold the cord, thereby enabling the simultaneous performance of the previously separate actions of puncturing and threading. And once the needle was invented, artisans could use finer cord and smaller holes, resulting in tighter, more thermally efficient seams in their clothing. For example, all other things being equal, the clothing worn by inhabitants at Malaya Syia likely had less thermally efficient seams than the clothing worn by inhabitants at both Which choice most effectively uses data from the table to complete the example?

- A. Stajnia Cave and Yafteh Cave.
- B. Yafteh Cave and Shizitan.
- C. Khayrgas Cave and Yafteh Cave.
- D. Khayrgas Cave and Shizitan. ey

Question 13

Source PDF page: 11

Baltimore, Maryland, has installed shoreline-hardening structures-mainly jetties- along 71% of its shoreline to protect infrastructure from wave erosion and other hazards. To evaluate the responses of waterbirds at sites in the Chesapeake Bay on the et al. surveyed waterbird communities consisting of sixty-four species, including the tundra swan and the great blue heron. Utilizing the Index of Waterbird Community Integrity (IWC]), on which a low score corresponds to low community integrity, the researchers concluded that shoreline hardening more negatively affects waterbirds than does land development for uses such as housing or agriculture. Which finding, if true, would most directly challenge the researchers' conclusion?

- A. Waterbird communities at Margothly, a site with a relatively low percentage of developed land and a relatively high percentage of hardened shoreline, had lower average IWCI scores than did waterbird communities at Back River, a site with a higher percentage of developed land and a lower percentage of hardened shoreline.
- B. Waterbird communities at Stony and Curtis, two sites with relatively high percentages of developed land and hardened shoreline, had similar IWCI scores, whereas waterbird communities at Ware and Honga, two sites with relatively low percentages of developed land and hardened shoreline, had widely differing IWCI scores.
- C. Waterbird communities at Mill, a site with a relatively low percentage of developed land and a relatively high percentage of hardened shoreline, had higher average IWCI scores than did waterbird communities at Langford, a site with a higher percentage of developed land and a lower percentage of hardened shoreline.
- D. Waterbird communities at Old Road, a site with a relatively high percentage of developed land and hardened shoreline, had lower average IWCI scores than did waterbird communities at Onancock, a site with a relatively low percentage of developed land and hardened shoreline.) E FEN

Question 14

Source PDF page: 12

Memoirs of Eleanor Eldridge is an 1838 historical account by Eleanor Eldridge and Frances Harriet Whipple Green. In the book, the authors suggest that many memoirs of renowned people aren't particularly straightforward or candid, writing, Which quotation from Memoirs of Eleanor Eldridge most effectively illustrates the claim?

- A. "There is often a kind of [deceptive] light, playing around such [famous] names, calculated to dazzle and mislead, by their false lustre, until the eye can no longer receive the pure light of Truth, or the mind appreciate real excellence, or intrinsic worth."
- B. "It should not be considered essential to the interest and value of biography, that its subject be of exalted rank, or illustrious name."
- C. "How careful ought we to be to speak nothing but the truth, even in regard to the most trifling circumstances; and not only so, but to be well assured that what we suppose to be true, is truth, before we receive it as such."
- D. "Blessed are the slumbers of the innocent. They are kindler than balm, and they refresh and gladden the spirit of childhood, like ministerings from a better world."

Question 15

Source PDF page: 13

Neuroscientist Artin Arshamian and his team sought to determine what affects a person's perception of an odor as pleasant: is it culture, personal taste, or aspects of human anatomy? The team assessed odor preferences in ten groups of people with different modes of living (urban, agricultural, and hunter-gatherer) including the Mah Meri people from a small community in the Malay Peninsula and the Imbabura Quichua people from a small community in Ecuador. The team observed little like citrus, and mushroom alcohol, which smells like fungus, suggesting that Which choice most logically completes the text?

- A. although many people from the Malay Peninsula and people from Ecuador rated mushroom alcohol as unpleasant, there were also many people from both places who likely rated it as pleasant.
- B. if people from Ecuador tended to rate mushroom alcohol as less pleasant than linalool, then people from the Malay Peninsula were also likely to rate mushroom alcohol as the less pleasant odor.
- C. people from the Malay Peninsula tended to rate linalool as more pleasant than mushroom alcohol regardless of differences in their anatomical characteristics or personal tastes.
- D. people from the Malay Peninsula and people from Ecuador tended to rate more odors as pleasant than as unpleasant.

Question 16

Jean-Michel Basquiat was an American artist who produced more than two thousand His work Self-Portrait was completed in 1981 and sold at auction in 2016 for \$4.7 million. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. drawing's and painting's.
- B. drawings and painting's.
- C. drawings and paintings.
- D. drawings' and paintings'.) E FEN ee RBH HEU, tA 000-/

Question 17

Source PDF page: 14

At the Ruskin School of Acting in Santa Monica, California, students can learn the world-famous Meisner technique. by acting teacher Sanford Meisner, this technique trains actors to react naturally to the other performers in a scene. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. Develops
- B. Developing
- C. Develop
- D. Developed

Question 18

Source PDF page: 14

Philosopher Gottlob Frege (1848-1925) explored how multiple names can be used to refer to the same object or person yet still have different meanings. (Unlock more SAT resources by adding our WeChat assistant at 13311268274.) For instance, the fictional character Clark Kent and his alter ego Superman are the same person, yet the two personas are distinct. For Frege, this raises further questions about how Which choice completes the text so that it conforms to the conventions of Standard English?

- A. we can hold contradictory beliefs about a single thing?
- B. can we hold contradictory beliefs about a single thing.
- C. we can hold contradictory beliefs about a single thing.
- D. can we hold contradictory beliefs about a single thing?

Question 19

Source PDF page: 15

Composed of clay and silicate rocks, are typically dark in appearance. M-type asteroids, on the other hand, are composed of nickel-iron and appear much brighter. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. the C-type classification applies to asteroids 74 Galatea and 90 Antiope, which
- B. 74 Galatea and 90 Antiope are classified as C-type asteroids, and asteroids
- C. C-type asteroids, such as 74 Galatea and 90 Antiope,
- D. asteroids, such as the C-type asteroids 74 Galatea and 90 Antiope,

Question 20

Source PDF page: 15

The city of Delhi, India, first opened its rapid transit in 2002. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. system the Delhi Metro,
- B. system, the Delhi Metro,
- C. system: the Delhi Metro
- D. system, the Delhi Metro

Question 21

Source PDF page: 15

Following the swing era of the 1930s, cool jazz emerged as yet another innovative style in jazz larger ensembles than those of their predecessors, cool jazz composers like Chico Hamilton emphasized smooth melodies in their works. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. music. Featuring
- B. music, featuring
- C. music, to feature
- D. music to feature)DEFEN ;

Question 22

Source PDF page: 16

Formerly known as the Indiana Territories, Indiana was granted statehood by a vote of comparison, as one of the nation's original thirteen colonies, Connecticut became a state when it ratified the US Constitution on January 9, 1788. New York attained statehood by ratifying the Constitution, becoming the 11th US state on July

- A.
- B.
- C.
- D.

Question 23

Source PDF page: 16

From mountains to monuments, deserts to rainforests, and isolated islands to teeming cities, the sites on UNESCO's World Heritage List are chosen because they hold cultural or natural value that the organization wishes to preserve for future generations. In 2008, UNESCO recognized the importance of France's Lagoons of New Caledonia, making up one of the largest reef systems in the world, by adding them to the list as a natural heritage site. Which choice completes the text with the most logical transition?

- A. By contrast,
- B. Next,
- C. Accordingly,
- D. In other words,

Question 24

Source PDF page: 17

The El Chaco meteorite, discovered in Argentina in 1969, weighs approximately

- A.
- B.
- C.
- D.

Question 25

Source PDF page: 17

While researching a topic, a student has taken the following notes: @ The cuneiform script is the earliest known set of symbols used for writing. @ Sumerian was one of the first languages to be written using the cuneiform script. @ Sumerian was a language in ancient Mesopotamia (present-day Iraq). @ Clay tablets with Sumerian writing have been found there. @ Some of these tablets are almost 5,000 years old. The student wants to identify a language that was written using the cuneiform script. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Examples of Mesopotamian writing that are nearly 5,000 years old have been found.
- B. Clay tablets with cuneiform script have been found in present-day Iraq.
- C. A language in ancient Mesopotamia used the cuneiform script for writing.
- D. Sumerian, an ancient Mesopotamian language, was written using the cuneiform script. wba

Question 26

Source PDF page: 18

A student has taken the following notes: @ A team of researchers led by Guanning Pang discovered that inactive volcanoes in the Cascade Range have large underground magma chambers 3 to 9 miles below their surface. @ Some of these volcanoes have been dormant for thousands of years. @ Researchers detected magma by tracking earthquake waves that slowed down when passing through chambers of magma consisting of 3% to 32% melted rock. @ Magma chambers need over 35% liquid rock to potentially erupt. @ These findings challenge the scientific theory that magma chambers only exist right before eruptions. @ The discovery could improve volcano monitoring and eruption prediction methods. A student wants to undermine a scientific assumption about magma chambers. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Scientists found inactive Cascade Range volcanoes with large magma chambers below their surface, challenging the theory that magma chambers only exist right before eruptions.
- B. Magma chambers need over 35% liquid rock to potentially erupt, refuting the assumption that volcanoes dormant for thousands of years have melted rock below.
- C. By tracking earthquake waves, Pang found that magma reservoirs sit 3 to 9 miles below the Cascade Range volcanoes' surface and need over 35% liquid magma to potentially erupt.
- D. Researchers detected magma chambers by tracking earthquake waves through partially melted rock, improving volcano monitoring and eruption prediction methods for dormant volcanoes. ey ee RBH HEU, tA 000-/

Question 27

Source PDF page: 19

While researching a topic, a student has taken the following notes: ® Tlahuelilpan is a municipality in the state of Hidalgo, Mexico. @ Municipalities are governmental regions responsible for providing many public services to their residents. @ Tlahuelilpan's population was 17,153 in 2010. @ Its population was 19,067 in 2020. ® Hidalgo is divided into 84 municipalities. The student wants to compare Tlahuelilpan's 2020 population with its 2010 population. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. In 2020, the municipality of Tlahuelilpan had a population of 19,067.
- B. Tlahuelilpan is one of 84 governmental regions, known as municipalities, in Hidalgo, Mexico.
- C. As a municipality in Hidalgo, Tlahuelilpan is responsible for providing many public services to its population.
- D. In 2020, Tlahuelilpan's population was greater than what it had been ten years earlier.

Module 2

Question 1

Source PDF page: 20

Quantitative analysis of vast historical data sets and other tools of abstraction allow historians to examine broad phenomena, but such methods the particularity of individual actors. By focusing on singular individuals and incidents in exhaustive detail, Paul Seaver's Wallington's World and other microhistories aim to show how broader phenomena were experienced at a human level. Which choice completes the text with the most logical and precise word or phrase?

- A. misconstrue
- B. efface
- C. exempt
- D. accentuate

Question 2

Source PDF page: 20

Featuring contributions from Zulema Valdez, Robert W. Fairlie, and other scholars, Advancing U.S. Latino Entrepreneurship (2020) is intended to two kinds of readers. According to Jerry I. Porras and the book's other editors, it should be of interest to researchers as well as current and aspiring entrepreneurs. Which choice completes the text with the most logical and precise word or phrase?

- A. detract from
- B. evaluate
- C. appeal to
- D. bewilder / 22 Seer) ee RBH HEU, tA 000-/

Question 3

Source PDF page: 21

The financial situation of playwrights in Elizabethan theater was often , but being as commercially successful as he was early in his career likely granted William Shakespeare security that contributed to his ability to later create Twelfth Night, Antony and Cleopatra, and other works still revered today. Which choice completes the text with the most logical and precise word or phrase?

- A. indecipherable
- B. justifiable
- C. predictable
- D. precarious

Question 4

Source PDF page: 21

advantages of the highly mobile DOM2 breed that emerged through domestication and selective breeding in the 3rd millennium BCE. DOM2 spread quickly and extensively, completely supplanting other horse breeds in places like El Acequién, Spain, and Hohler Stein bei Schwabthal, Germany, by the end of the 2nd millennium BCE. Which choice completes the text with the most logical and precise word or phrase?

- A. profusion
- B. homogeneity
- C. ubiquity
- D. variability

Question 5

Source PDF page: 22

The desirability of minimizing the use of adverbs, especially those ending in-ly (e.g., "obediently"), in prose fiction is a point of agreement among many novelists, including Graham Greene, who described adverbs as "damaging to a writer." To investigate whether-ly adverb avoidance is associated with literary achievement, statistician Ben Blatt calculated the frequency with which such adverbs occur in the works of E.M. Forster and other prominent English-language novelists and found that there is a positive correlation between low-ly adverb frequency and novels' perceived literary merit. Which choice best describes the overall structure of the text?

- A. It makes a claim about a trait of prose fiction, details an observation about that trait's increasing proliferation, and then makes a supposition based on that observation.
- B. It mentions a popular strategy for crafting prose fiction, outlines a benefit of that strategy, and then presents research that provides a more nuanced view of that benefit.
- C. It describes a phenomenon inherent to prose fiction, summarizes a procedure used to investigate that phenomenon, and then notes a benefit of that procedure.
- D. It introduces a widely held view on prose fiction, offers an example of what a proponent of that view has asserted, and then discusses a study examining data relevant to that view. eee

Question 6

Source PDF page: 23

The fecal-steroidal profile of pronghorn is clearly distinct from those of other ungulates. By contrast, bison dung cannot be distinguished from elk dung based solely on their fecal-steroidal profiles, as both contain similar levels of beta-sitosterol and cholestanone, among other sterols. The relative levels of fecal zoosterols (steroids with animal origins), such as coprostanol and epi-coprostanol, in layers of lake bed sediments at Buffalo Ford Lake in Yellowstone National Park show that bison, elk, or both have been the dominant ungulate species in the lake's watershed for at least the last 2,000 years. Which choice best describes the function of the underlined portion in the text as a whole? A. It offers context that helps account for the finding that the dominant ungulate species in the Buffalo Ford Lake watershed have been largely unchanged for at least

- A.
- B.
- C.
- D.

Question 7

Source PDF page: 24

Text 1 Kikko (tortoiseshell) and other Japanese sashiko embroidery patterns use motifs drawn from nature and daily activities, classic sources of inspiration in folk-art traditions. A category that resists firm delineation, folk art is generally defined by an intimate connection to everyday life. "The beauty of such objects," writes Sdetsu Yanagi in *The Unknown craftsman*, "is not so much of the noble, the huge, or the lofty as a beauty of the warm and familiar." Text 2 Through their beautiful handmade aesthetic, painting and textiles from Japan's twentieth-century mingei (folk art) movement represent an ambiguous rejection of mass-produced consumer goods. At the same time, mingei, properly considered, stands apart from fine art, as its rootedness in commonplace craft traditions gives it an authenticity and accessibility that fine art, with its prizing of sophistication and innovation, cannot match. Which choice best describes how Text 1 differs from Text 2? A. Both texts highlight the principally utilitarian nature of folk-art objects, but Text 1 acknowledges a complementary decorative function that is not mentioned in Text 2. B. Text 1 suggests that the nature-based aesthetic of folk art is inherently resistant to altered how folk art is made. Text 2 describes how a universal characteristic of folk art is manifest within a specific tradition. D. Both texts valorize folk-art traditions, but Text 1 does so by emphasizing qualities that are intrinsic to folk art, whereas Text 2 makes reference to other modes of cultural production. re) E FEN

- A.
- B.
- C.
- D.

Question 8

Source PDF page: 25

Like most dog breeds developed in the Americas, the dogo argentino descends from dogs brought from Europe during the colonial era. In contrast, the Xoloitzcuintli is among a handful of breeds that descend from non-European populations that predated colonization. In 2013, researchers added another breed to this list: the Carolina dog, which is native to rural pockets of the Southeastern US. This breed has a unique genetic link to East Asian populations that were themselves the ancestors of the precolonial dogs of the Americas. What is the subject of the main distinction the text draws between the dogo argentino and the Xoloitzcuintli?

- A. The size, coloration, and other traits typically associated with the two breeds
- B. The geographical origins of the populations from which the two breeds descend
- C. The degree to which the two breeds contributed to the ancestry of breeds developed more recently
- D. The rate at which the two breeds spread from their places of origin to the Southeastern US)DEFEN ;

Question 9

Source PDF page: 26

Online surveys are a common tool researchers use to collect information. These surveys are usually designed for use on personal computers (PCs), but more people are using smartphones to complete them than they are PCs. This shift in device usage may change how participants interact with online surveys. When researchers Jean Philippe Décieux and Philipp E. Sischka investigated, they found that PC users were more likely to multitask while taking surveys than smartphone users were, but PC users were also more likely to complete the surveys. Which choice best states the main idea of the text?

- A. A study shows that the type of device people use to complete online surveys affects how they interact with these surveys.
- B. Researchers are investigating why survey completion rates are higher on PCs than they are on smartphones, despite increased multitasking on PCs.
- C. People are choosing to take online surveys on smartphones more often than they are on PCs because smartphones are convenient.
- D. Researchers prefer online surveys to other ways of collecting information because they think online survey results are more reliable. } 28 Seer) ee

Question 10

Source PDF page: 27

In the Greek village of Pyrgi, the buildings are embellished with xysta, a traditional design featuring rows upon rows of carved geometric shapes on the facades of rooted in Pyrgi's cultural history and handed down over generations, the techniques used for creating these precise patterns involve mathematical principles and tools, such as compasses and rulers. Studying the history of xysta, therefore, has given researchers an understanding of how mathematics has been used in this region dating to the medieval period. Which choice best states the main idea of the text?

- A. There is more academic interest in the tools the Pyrgi people use to construct xysta than in the appearance of xysta.
- B. The people of Pyrgi constructed xysta on their buildings to show an appreciation for mathematics.
- C. The construction of xysta on buildings was first completed in the village of Pyrgi during the medieval period.
- D. Research on techniques used to construct xysta has helped reveal the role of mathematics in the culture of Pyrgi. wee

Question 11

Source PDF page: 28

From meerkats to leaf beetles, many animals practice some form of brood care (caring for offspring). Chenyang Cai and team claim to have found the earliest evidence of this behavior in insects in 163.5-million-year-old remains from the Haifanggou Formation in China, a location that has yielded many fossils, including those of long-proboscid scorpionflies. Cai and team examined 157 specimens of the extinct water boatman species *Karataviella popovi* and noted thirty individuals that appear to carry eggs on one of their legs. This finding establishes brood care in insects approximately 38 million years earlier than previously known. Which choice best states the main idea of the text?

- A. Cai and team's study of *K. popovi* fossils suggests that brood care in insects began earlier than formerly established.
- B. Cai and team concluded that *K. popovi* likely carried their offspring on one of their legs.
- C. The Haifanggou Formation is an abundant source of fossilized scorpionflies and *K. popovi*.
- D. Research shows that long-proboscid scorpionflies inhabited the location that is now the Haifanggou Formation long before *K. popovi* did. wee

Question 12

Source PDF page: 29

Andrea Sommesse, Andrea Temesi, and team investigated head-tilting behavior in a group of forty dogs, which included thirty-four typical dogs from five different breeds (including Benhur, a kelpie) and six dogs that had previously demonstrated giftedness at learning words, all of which were border collies. The researchers recorded the dogs' head-tilting behavior in response to requests to fetch a toy that had been introduced early in the study. They found that all six gifted dogs tilted their heads at least some of the time when asked to retrieve the toy by name, while the typical dogs almost never tilted their heads. After reviewing the study, a student concludes that a tendency to tilt their heads is a characteristic trait of all border collies. Which finding from the study, if true, would most directly challenge the student's conclusion?

- A. The typical dogs that tilted their heads appeared to be processing the meaning of the requests.
- B. Most of the gifted dogs tilted their heads to the same side in each trial.
- C. The majority of dogs in the typical group were border collies.
- D. The border collies successfully fetched the toy more often than the dogs of other breeds did. / 31 , Beart) \$\$\$ |) 49) SAT @O BS

Average Ratings of Perceived Personality Traits of Dogs and Human Willingness to Keep or Interact with Them Image Irises Not friendly | Immature(Would not Would not IDnumber (0)-Friendly | 0)-Mature(keep interact with (5) 5) (0)-Would (0)-Would keep (3) interact with (3) 6 [dak [408 [29s [ess | Dogs and modern gray wolves share a recent wolf ancestor from which dogs were domesticated. Noting that dogs tend to have darker irises than gray wolves do, Akitsugu Konno et al. presented facial images of dogs with a range of iris colors to human participants, who rated the dogs' personality traits and their own attitudes toward the dogs. On the basis of their findings, Konno et al. concluded that the dog-wolf iris pattern may be an effect of human selection for a positively perceived trait during domestication. Which choice best describes data from the table that support Konno et al.'s conclusion?

- A. Participants rated the dogs in images 3 and 6 as friendlier than the dogs in images 14 and 20 and indicated that they were more willing to interact with or keep the dogs in the former two images than the dogs in the latter two images.
- B. Participants rated the dog in image 6 as friendlier than the dog in image 3 and rated the dog in image 14 as friendlier than the dog in image 20.
- C. Participants rated the irises of the dogs in images 3 and 6 as darker than the irises of the dogs in images 14 and 20.
- D. Participants rated the dogs in images 14 and 20 as more mature than the dogs in images 3 and 6 and indicated that they were more willing to interact with or keep the dogs in the former two images than the dogs in the latter two images. re)DEFEN |

Mariana Lopes Barata and Pedro Siméas Coelho collected data from 324 music-streaming service users to identify factors that influence users to opt for paid (premium) versions of music streaming services, like Apple Music. They found that performance expectancy (how much the use of a service is perceived to benefit the consumer) is positively correlated with users' intentions to adopt premium versions. They also found that users' intentions to purchase a premium service positively influence their intentions to recommend the premium service to others, which suggests that Which choice most logically completes the text?

- A. by encouraging existing users of premium services to recommend those services to nonusers, music streaming companies may be able to increase the extent to which their existing users perceive the use of the premium version to be beneficial.
- B. users' intentions to pay for premium streaming services are probably unaffected by factors other than performance expectancy.
- C. if music streaming companies can increase the degree to which some potential users perceive the use of the premium version to be beneficial, they may be able to generate interest in their premium services from other potential users that they have not reached directly.
- D. participants who strongly agreed with the statement "Overall, a paid music Music than to other streaming services.

Question 16

Exclusively inhabiting tropical countries such as Ghana, wild chimpanzees lack adaptations to seasonal variations in ultraviolet B (UVB) irradiance from sunlight. Since UVB exposure enables vertebrates to synthesize vitamin D, Sophie Moittie and colleagues studied zoo chimpanzees in Spain and other mid-latitude countries to see how vitamin D levels are affected by the seasonal variations in UVB irradiance that occur in those locations. They found that chimpanzees' vitamin D levels were significantly lower in autumn than in summer and appeared unaffected by oral supplementation of vitamin D administered by zookeepers. Moittie and colleagues point out, however, that supplementation was rare, highly varied, and poorly tracked, and therefore Which choice most logically completes the text?

- A. providing zoo chimpanzees in Spain and other mid-latitude countries with supplemental vitamin D has no promise as a strategy for offsetting autumn reductions in their vitamin D levels.
- B. vitamin D levels in zoo chimpanzees in Spain and other mid-latitude countries may be higher during autumn than Moittie and colleagues' data appear to indicate.
- C. the seasonal patterns in vitamin D levels among zoo chimpanzees in Spain and other mid-latitude countries are likely similar to those observed among wild chimpanzees in Ghana and other tropical countries.
- D. the lack of an observed effect of supplemental vitamin D on zoo chimpanzees in Spain and other mid-latitude countries may reflect shortcomings in the data rather than actual ineffectiveness. ey ee RBH HEU, tA 000-/
