Module 1

Question 1

Source PDF page: 1

" Bien Pretty" is an English-language short story by Sandra Cisneros that often includes Spanish words and phrases. In *Their Dogs Came with Them*, Helena Maria Viramontes frequently Spanish text as well. But readers who are unfamiliar with Spanish can easily read both works since the meaning of the Spanish text can be inferred from the surrounding English text. Which choice completes the text with the most logical and precise word or phrase?

- A. suspects
- B. relaxes
- C. loses
- D. uses

Question 2

Source PDF page: 1

The following text is from Jacqueline Woodson's 2018 novel *Harbour Me*. My uncle is a musician and a storyteller. He says the hardest part of telling a story is finding the beginning. ©2018 by Jacques Woodson
As used in the text, what does the word "finding" most nearly mean?

- A. Reassuring
- B. Asking
- C. Identifying
- D. Insulting

Question 3

Source PDF page: 2

Social media is changing how country music fans find new songs. The song "New Normal" became a huge hit after people shared posts with clips of the song.(More mock practices are available at www.hdfedu.com.) The song's success reflects recent research findings that 45% of music fans aged 18 to 24 look on social media platforms to new country music and often check these platforms before trying traditional radio or streaming services. Which choice completes the text with the most logical and precise word or phrase?

- A. repeat
- B. memorize
- C. discover
- D. calculate

Question 4

Source PDF page: 2

Text 1 From the extinct Shasta ground sloth to the living Hoffmann's two-toed sloth, sloths are among the most appealing animals native to the Americas. But scientists still have a lot to learn about them. Unlike their ancient ground-dwelling relations, today's sloths spend most of their time high up in trees. The sloths' inaccessibility has made it hard for scientists to study them. Text 2 By using a hat-like monitor, biologist Bryson Voirin and colleagues can at last discover the previously hidden activities of sloths. Such monitors can provide information to correct misconceptions. It was long believed that sloths are very gentle. But, in fact, sloths have very sharp claws and will attack if threatened. Based on the texts, the author of Text 1 and the author of Text 2 would most likely agree with which statement about sloths?

- A. Sloths typically live very long lives.
- B. Sloths have been challenging to observe.
- C. Sloths are usually unpleasant animals.
- D. Sloths prefer certain types of trees over other types.

Question 5

Source PDF page: 3

Text 1 Norse settlers occupied part of Greenland from about 985 CE until the early 15th century, when they mysteriously abandoned the region. Many researchers cite increasingly lower temperatures to explain why the Norse fled. The researchers reason that the Norse settlers arrived in the region while the climate was warm and were able to remain there until temperatures declined during the Little Ice Age, which occurred between the 14th and 19th centuries. Text 2 Jeffrey Salacup, Isla Castafieda, and colleagues analyzed sediment samples from a lake in Greenland close to the Norse settlement. This allowed them to reconstruct the area's climate history. The researchers found no evidence of substantial temperature changes during the settlement period. They argue that instead the region experienced a persistent drought, which played a more important role in forcing the Norse out of the area than did increasingly lower temperatures.

- A. Why did the Norse settlers abandon their settlement in Greenland?
- B. What was the average global temperature during the Little Ice Age?
- C. How often did the Norse settlers in Greenland experience drought?
- D. Where was the first sediment sample of a Norse settlement found? go ur espe HER

Question 6

High-speed rail systems-in which trains can move at great speeds-are expanding in many countries because high-speed rail can reduce the number of automobiles on the road and ultimately conserve energy. In Austria, for instance, 254 kilometers of high-speed rail lines are in operation as of 2023, and 231 kilometers are under construction. Based on the text, why might Austria be expanding its high-speed rail system?

- A. Residents of Austria demand that high-speed rail be expanded despite the cost of doing so.
- B. High-speed rail systems in Austria are currently viewed more favorably than they have been in the past.
- C. The current high-speed rail systems in Austria are getting older and need improvements.
- D. High-speed rail systems are a more energy-efficient choice for residents of Austria than automobile use is.

Question 7

Source PDF page: 5

Films based on famous books tend to do well in theaters: when Terry McMillan's acclaimed novel *How Stella Got Her Groove Back* was adapted into a movie in 1998, it was a commercial success. To investigate whether book-to-movie adaptations also have an impact on the books' popularity, two researchers examined online activity related to *The Monuments Men* and two other books that have been turned into movies. They found that the films' releases in theaters coincided with increased intent to read the original books but not with higher average ratings for those books. Information in the text best supports which statement about book-to-movie adaptations?

- A. They often achieve great commercial success but are generally perceived as lacking in artistic value.
- B. They may lead to increased interest in the original books but not necessarily to greater liking of those books.
- C. They are generally the least well received by people who have read the original books.
- D. They may damage the reputation of the original books, but any such negative effect is of short duration.

Question 8

Source PDF page: 5

Emulsification is a process that creates a uniform mixture that includes two ingredients that do not combine on their own, such as oil and water. For this process to happen, a third ingredient, an emulsifier, must be combined with the other two. Carrageenan, a substance extracted from red seaweed, is a common emulsifier: it helps to create a smooth texture in yogurt that makes it more pleasant to eat. According to the text, what result is associated with carrageenan?

- A. It prolongs the time it takes for ingredients to mix together during the making of yogurt.
- B. It assists in the evaporation of water during the making of yogurt.
- C. It helps ensure that yogurt has a smooth texture.
- D. It decreases the amount of one ingredient in yogurt while increasing the amount of another. ie
