SAT Reading and Writing Questions - standardized for website upload

Module 1

Question 1

Source PDF page: 2

SRE 6 Acs C M1-3 Writer Lydia Davis observed that while literary forms, such as the poem, are recognizable as such even as they evolve, there are pathbreaking "intergenetic" forms, that might, for example, use elements of both fables and realist narratives to create something unclassifiable, Davis's own very short literary pieces arguably fit in this category, since they straddle the line between prose and poetry. Which choice completes the text with the most logical and precise word or phrase?

- A. innovative
- B. elusive
- C. established
- D. ambiguous

Question 2

SREEtD 6 AdLse C M14 Mauricio Drelichman and Hans-Joachim Voth's analysis of the overall debt repayments and expenditure of the government of Philip II (who ruled an empire including Spain and Milan from 1556 to 1598) found an seeming contradiction although the government had several short-term cash shortage, it ran an even larger overall surplus than did the government of eighteenth-century Britain, a nation considered. of fiscal virtue Which choice completes the text with the most logical and precise word or phrase? A. a sanction B. a paradox D. an omen

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 3

Source PDF page: 3

The following text is adapted from Virginia Woolf's 1919 novel Night and Day. Katharine is the granddaughter of a celebrated poet. [Katharine's] descent from [a celebrated poet] was no surprise to her, but matter for satisfaction, until, as the years wore on, certain drawbacks made themselves very manifest. Perhaps it isa little depressing to inherit not lands but an example of intellectual i {rtue; pethaps the conel mess of a great ancestor is a little couraging to those who run the risk of comparison with him, As used in the text, what does the word "manifest" most nearly mean? A. Possible B, Evident C. Complex D. Particular 'The discoverers of the minor planet 2731 Cucula named it after the animal genus that includes cuckoos. Most of the recently discovered minor planets, however, are given only an identification number, a trend that can be to there being over '500,000 such bodies known at present, making it nearly impossible to find a unique name for Which choice completes the text with the most logical and precise word or phrase? A. attributed B, referred C. alluded D. entrusted Many visitors to Yellowstone National Park need airlines, car rentals, hotels, and restaurants during their visits. These services generate carbon emissions. Emily Wilkins and Jordan Smith found that most of the environmentally harmful emissions come from travel serv to and from the park. Wilkins and Smith f reduce these emissions by encouraging 'or national parks closer to their homes to cut down on their travel, the function of the underlined sentence in the text as a A. It presents a harm that is unique to the location described earlier in the text. B. It indicates that policymakers have been working on a certain problem for a long, time C. It suggests a course of action to address the problem described earlier in the text. D. It rephrases the question raised in the first sentence of the text,

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]

D. [choice text not detected]

Question 6

Source PDF page: 4

'Though John Crowley, author of *Flint and Mirror*, is perhaps not as well known as the most commercially successful American writers of the past fifty years, his work has had several influential champions, including the poet James Merrill and the literary critic Harold Bloom. In his afterword to Crowley's book *Little, Big*, Bloom praises how the novel adroitly blends what playwright Friedrich Schiller termed the th and sentimental modes - while Schiller thought works could be classified as either naive (seeking to describe reality) or sentimental (seeking to develop ideas), *Little, Big* fuses both modes of writing. Which choice best describes the function of the underlined portion in the text as a whole?

- A. It gives a reason why a critic appreciates a certain book.
- B. It helps clarify the distinction between two categories
- C. It compares the work of a writer with that of a poet who admired him.
- D. It contrasts the opinions of two critics.

Question 1

Source PDF page: 5

The following text is adapted from Anthony Trollope's 1855 novel *The Warden*. The narrator is describing a rectory, the residence of a clergyman. Let us observe the well-furnished breakfast-parlour at Plumstead Episcopi, and the comfortable air of all the belongings of the rectory. Comfortable they certainly were, but neither gorgeous nor even grand; indeed, considering the money that had been spent there, the eye and taste might have been better served; avoided without any sacrifice of propriety; colours might have been better chosen and lights more perfectly diffused; but perhaps in doing so the thorough clerical aspect of the whole might have been somewhat marred. there was an air of h about the rooms which might have been: Which choice best states the function of the underlined portion in the text as a whole? A. It offers a potential explanation for the furnishing choices the narrator critiques. B. It emphasizes that the narrator finds it inappropriate for a clergyman to have such grand furnishings. C. It signals how the inexpensive-looking ornaments in the rectory could be enhanced. D. It concedes that there is a lack of attention to the impression the rectory makes on people.

Ollantay is a play in Quechua, an Indigenous language in South America. The play known text of the play is from 1770, and in many places its writing style resembles the writing style of Spanish plays from the 1700s. 'Thus, Ollantay was probably created in the late 1700s by someone who knew much about the Inca past. Text 2 Ollantay includes details of Inca society that a writer in the 1700s wouldn't have known about. Also, the play's structure matches descriptions of the structure of Inca 1700s. By the time it was written down in 1770, it could have easily been influenced by later Spanish plays. Based on the texts, what do the author of Text 1 and the author of Text 2 mainly disagree about? 'A. What inspired a Spanish writer in the 1700s to write a play about the Inca Empire in the 1700s C. How the Inca author of Ollantay knew so much about plays from Spain D. Why Inca plays became more popular in the 1700s than they had been when they were first written.

In a period of great prosperity during his reign, Egyptian pharaoh Amenemhat III (c. 1800 BCE) had a pyramid with a massive substructure built at Hawara. The underground complex was largely dismantled in antiquity, but accounts of its splendor survive from the historian Herodotus, who claimed to have seen it. Herodotus wrote that it had 3,000 chambers adorned with reliefs, including one from Greek gods (c. 425 BCE), Herodotus wrote of carved figures, a dozen courts flanked by white stone pillars, and many winding passages in the complex, characterizing it as a great labyrinth and "an unending marvel." In his *History*. According to the text, what information did Herodotus include in his *Histories*?" A. An account of the magnificence of the complex that once stood beneath the pyramid at Hawara B. A record of how long it took for the pyramid and complex to be constructed at Hawara C. A discussion of how building the pyramid and complex at Hawara led to a period of prosperity D. An explanation of how Herodotus was able to see the pyramid and complex at Hawara.

Dubautia carriei is among the twenty-eight species of silversword plants found only on the Hawaiian archipelago that collectively illustrate the process of adaptive radiation, or the rapid diversification of an ancestral species into different, related species. Each silversword species is physically distinct, with mature plant forms ranging from tree and shrubs to vines. However, they all descended from a common tarweed plant species, with their unique physical characteristics emerging as they adapted to the archipelago's many specific habitats over time. Which choice best states the main idea of the text? A. All silverswords that grow on the Hawaiian archipelago have similar physical characteristics. B. The Hawaiian archipelago exhibits many distinct habitats and species. C. Most plants that grow on the Hawaiian archipelago are descendants of a single founder species. D. Silverswords are good examples of adaptive radiation on the Hawaiian archipelago.

Total Area of Five Tribal Nations around the United States

Tribal Nation	Location	Area (square miles)
White Mountain Apache Tribe	Arizona	2,631
Crow Tribe	Montana	3,606
Leech Lake Band of Ojibwe	Minnesota	131
Chickasaw Nation	Oklahoma	7,048
Cheyenne River Sioux Tribe	South Dakota	4419

A citizen of the Leech Lake Band of

Ojibwe is a student in a geography class. The student wants to compare the total area covered by her tribal nation in Minnesota with the total areas covered by certain tribal nations in other states. Looking at the table, she finds that the area of the Leech Lake Band of Ojibwe is 1,311 square miles, while the area of the White Mountain Apache Tribe in Arizona is Which choice most effectively uses data from the table to complete the comparison?

- A. 7,648 square miles.
- B. 2,631 square miles.
- C. 4,419 square miles.
- D. 3,606 square miles. RH SMe BSRSRATM As of 2023, Turkey has 1,015 kilometers of high-speed rail lines in operation and 614 kilometers under construction; in Germany, 1, 630 kilometers are in operation with n. In contrast, the United States has a relatively low amount of high-speed rail for its size: only 735 kilometers of high-speed rail in

Question 3

Source PDF page: 10

262 kilometers under construct operation and 1,789 kilometers under construction, Many US transportation exper argue that this should change, claiming that high-speed rail is more cost-effective than highway systems are. Which finding, if true, would most directly support the US transportation experts? claim? 'A. In most locations in the US, inereasing highway capacity is more expensive relative to the volume of traffic that can be accommodated than inereasing high-speed rail capacity is, B, In much of the US, the existing rail infrastructure is so old that it would have to be replaced entirely in order to accommodate high-speed trains. C. Building successful hi speed rail infrastructure would require that the US government establish a fund to maintain the ral lines long-term, D. Unlike people in the United States, people in Turkey and Germany are less interested in traveling by highway than they are in traveling by high-speed ral 19801990 2000-2010 Year - t - Philippines --- Singapore sO Mexico A report from an international organization that monitors the numbers of women serving as judges or magistrates on various nations' highest courts, such as the Supreme Court of Justice in Mexico and the Supreme Court in the Philippines, found that the overall trend is toward more women serving on the high courts in 2010 than in 1980, For example, none of the countries in the graph had more than 2 women in these positions in 1980, but Which choice most effectively uses data from the graph to complete the example? A. in 2010, Singapore had 3 women on its high courts, the Philippines had 3, and Mexico had 3. B, neither Singapore nor the Philippines saw a reduction in the women on their high courts in any of the years shown on the graph, but Mexico did after 1990. h courts from 1980 to 2010 in C. the inerease in the number of women on the ore was greater than that in either the Philippines or Mexico. D. Mexico had 2 women on its high courts in 1980 and 3 in 2010. Careful planning was essential for the success of the Deep Impact probe, whi conducted a flyby of comet 9P/ Tempel and then traveled to comet 103P/Hartley. The CONTOUR probe mission seemed similarly well planned, but engineers lost communications with the probe before it could achieve the mission goal of visiting comet 73P/Schwassmann-Wachmann, This shows that Which choice most logically completes the text? A. the Deep Impact was more successful than the CONTOUR because it had fewer tasks to accomplish st one of B. having multiple mission goals ensures that a probe will accomplish at l its tasks, C. the CONTOUR would likely have accomplished its tasks somewhere other than comet 73P/Schwassmann-Wachmann. D. careful planning alone does not guarantee that a probe will accomplish its mission. if it had been sent Dermatological researchers and geneticists make regular use of representative cross-sections of hair fibers, but such a cross-section can be obtained only if the strand can be cut perpendicular (O its length without distorting the cross-sectional shape, whi necessitates embedding the hair in a stabilizing medium, often resin, before sectioning it. Resin is effective but slow due to its long curing time, which led Tina Lasisi and colleagues to try sheets of low-melt-point plastic as a stabilizer. They found that these sheets match resin's utility as a stabilizer while allowing for near-instantaneous embedding of hair, thereby demonstrating that using low-melt-point plastic sheeting rather than resin can enhance Which choice most logically completes the text? 'A. an embedded hair's cross-sectional shape without reducing the researchers' likelihood of obtaining perpendicular cuts. B, the efficiency of preparatory steps before sectioning a hair without compromising the hait's cross-sectional shape. C. the rate at which hairs ean be embedded before sectioning because no stabilizing agent is used. D. the researchers' likelihood of obtaining perpendicular cuts while simplifying the process of preparing a hair for sectioning.

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 16

Source PDF page: 13

In the 1920s and 1930s, the singer Frank "Machito" Grillo performed with Cuba's 'most popular dance orchestras. However, the fusion of Latin music and American jazz that M: to innovated while performing in New York City is what has Which choice completes the text so that it conforms to the conventions of Standard English? 'A earned him his enduring fame? B. his enduring fame earned him? C. his enduring fame earned him. D. carned him his enduring fame.

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 7

Source PDF page: 14

Before the Spanish arrived in the 1400s, the people of La Gomera, one of the Canary Islands, would use a whistled version of their native language to "speak" to each other from far away. Ami skills to whistle to each other in Spanish, ingly, under Spanish rule, the adapted their whistling Which choice completes the text so that it conforms to the conventions of Standard English?

- A. island's residents,
- B. islands resident's
- C. island's resident'
- D. islands residents"

Question 18

Source PDF page: 14

Assembling by hand and in painstaking detail, Nigerian American artist Nijideka Akunyili Crosby works at a methodical pace when completing her massive collage-based paintings. Which choice completes the text so that it conforms to the conventions of Standard English? B. that Cher D. them Like almost every country in the world, Britain has been allocated an international dialing prefix to help route incoming international calls. First assigned to Britain in the 1960s Red Book, a directory published by a United Nations telecommunications agency, Which choice completes the text so that it conforms to the conventions of Standard English? A. intemational direct dialing was not widely available until the1970s, so initially, only switchboard operators used the prefix. B. not until the 1970s did intemational direct dialing be 'meaning that, initially, only switchboard operators used the prefix. C. initially, only switchboard operators used the prefix, as international direct dialing was not widely available until the1970s, D. the prefix was used by only switchboard operators initially, as international direct dialing was not widely available until the 1970s,

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 20

Artist Yio Barrada's exhibition Ways fo Baffle the Wind incorporates sculptures, textiles, and films. Barrada's pieces, utilizing elements as disparate as plant-dyed fabries, wire crab traps filled with stones, and cotton balls dangling above a fan, the ways humans attempt to organize and regulate nature, Which choice completes the text so that it conforms to the conventions of Standard English? 'A. has explored B. explore C. explores D. exploring

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]

D. [choice text not detected]

Question 2

Source PDF page: 16

Artist and writer Kameelah Janan Rasheed wanted to demonstrate the value of textual revision and to encourage audiences to embrace it as a sign of learning. she was transparent about the revision process for her 2019 book *No New Theories*, adding annotations to the original text to indicate where her ideas had shifted or deepened. Which choice completes the text with the most logical transition?

- A. Thus,
- B. Nevertheless,
- C. Instead,
- D. Later,

Question 21

Source PDF page: 16

A team led by Portuguese researcher Isabel C. F. R. Ferreira found that many species of mushrooms contain chemicals called phenolic compounds, such as cinnamic acid and catechin. Ferreira detected cinnamic acid in *Agaricus blazei* mushrooms and catechin in *Lentinus edodes* mushrooms. Which choice completes the text with the most logical transition?

- A. For this reason,
- B. However,
- C. Nevertheless,
- D. For example,

Question 23

Source PDF page: 17

In a hypothetical family tree, it is common for a parent in the first generation to exhibit a given trait, such as dimples, and for none of that parent's children (second generation) to inherit it. the grandchildren (third generation) could inherit dimples or another such trait from the grandparent Which choice completes the text with the most logical transition? 'A. Nonetheless, B. Specifically, C. Besides, D. In addition,

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 24

Source PDF page: 17

'Teams from 32 countries gathered in Brazil in 2014 for the World Cup of men's soccer, The event, which is held every four years, now features teams from all over the world, The World Cup used to be much smaller and more limited geographically, 'The 1934 event in Italy included only 16 teams, most from Europe and the Americas. Which choice completes the text with the most logical transition?

- A. indeed.
- B. though.
- C. for example.
- D. moreover.

Question 25

Source PDF page: 18

While researching a topic, a student has taken the following notes: Most of the plant and bird species in Oahu, Hawaii, are non-native. In a 2019 study, researchers wanted to know what role non-native birds play in dispersing plant seeds in Oahu. + Researchers catalogued plant seeds found in fecal samples from non-native birds, *Psydrax odorata*, a flowering shrub, was one of fifteen native species catalogued. *Hedyehium gardnerianum*, an herbaceous vine, was one of twenty-nine non-native species catalogued. Researchers concluded that non-native birds play a vital role in dispersing the seeds of native and non-native plants. The student wants to explain what *Psydrax odorata* is. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. In a 2019 study, researchers catalogued seeds from *Psydrax odorata*
- B. *Psydrax odorata* is a flowering shrub species that is native to Oahu, Hawaii,
- C. Most plant species found in Oahu, Hawaii, like *Hedyehium gardnerianum*, are non-native,
- D. Seeds from *Psydrax odorata* were found by researchers in the feces of non-native birds,

Question 26

Source PDF page: 19

While researching a topic, a student has taken the following notes: *The Future of Nostalgia* is a scholarly book by literary theorist Svetlana Boym. The book provides a multifaceted exploration of the concept of nostalgia, + Chapter 4 defines a form of nostalgia interested in re-creating the past. + Chapter 5 explores the Soviet-style restaurant the Nostalgija Snack Bar in Ljubljana. In chapter 5, Boym writes, "[The Nostalgija Snack Bar] is a new kind space that plays with the past and the present." The student wants to provide a quotation from chapter 5. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A. Svetlana Boym defines a form of nostalgia interested in re-creating the past in chapter 4 of her book.

B. In a discussion of the Soviet-style restaurant the Nostalgija Snack Bar in Ljubljana, Svetlana Boym writes, "[The Nostalgija Snack Bar] is a new kind space that plays with the past and the present."

C. Svetlana Boym's *The Future of Nostalgia* provides a multifaceted exploration of nostalgia.

D. After defining a form of nostalgia interested in re-creating the past, Svetlana Boym goes on to explore the Soviet-style restaurant the Nostalgija Snack Bar in Ljubljana.

While researching a topic, a student has taken the following notes: 1905: US astronomer Percival Lowell begins searching beyond Neptune for a mysterious planet he calls "Planet X." + 1916: Lowell dies but leaves money to upgrade his observatory. + 1929: A new telescope is built at the observatory. February 1930: Observatory assistant Clyde Tombaugh records the first photographic evidence of Planet X. March 1930: Astronomers rename Planet X, calling it Pluto to honor Lowell (the first two letters are Lowell's initials, PL). The student wants to specify Percival Lowell's contributions to the discovery of Pluto. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Astronomers renamed Planet X in 1930 to honor Lowell for his contributions to the discovery of Pluto.
- B. After a new telescope was built at Lowell's observatory in 1929, Clyde Tombaugh recorded the first photographic evidence of Planet X, later renamed Pluto.
- C. In 1930, Lowell became the first person to record photographic evidence of Pluto, known at the time as Planet X.
- D. Lowell began the search for Pluto in 1905 and later left money to upgrade the observatory where it was discovered in 1930.

Module 2

Question 1

Source PDF page: 21

Scholars long thought that the initial spread of silk beyond China occurred in the second century CE, but this view has been by new archaeological evidence from South Asia that reveals that the people of the Indus Civilization made use of silk at least 1,000 years earlier. Which choice completes the text with the most logical and precise word or phrase?

- A. investigated
- B. contradicted
- C. misinterpreted

D. anticipated

Question 2

Source PDF page: 21

In a 2022 study, Nicol's M. Morato and colleagues attempted to resolve a long-standing paradox: although water is critical to most reactions that enable life, during the earliest stages of Earth's history - when most of the planet's surface was covered by oceans - the presence of water likely the formation of prot and other biomolecules that are found in all living organisms. Which choice completes the text with the most logical and precise word or phrase? A. exploited B. imitated C. hampered D. reflected A team of microbiologists measured surface temperatures of various wild mushrooms, including *Amanita muscaria* and a species from the genus *Thelephora*. The temperatures ranged from 1.4 to 5.9°C lower than the temperature of the surrounding air, a difference the team to water evaporating from the mushrooms and thus cooling them. Which choice completes the text with the most logical and precise word or phrase?

- A. conceded
- B. prescribed
- C. attributed
- D. amended

Question 4

Source PDF page: 22

Despite stated claims of the of the research, much analysis of income inequality performed in the 2010s suffered from a myopic focus on a few countries in North America and Western Europe, partly due to limited data availability. administrative records located in nations in Africa, such as Ivory Coast, and Eastern earchers would later remedy this shortcoming after gaining new access to Europe, such as Poland, the text with the most logical and pret word or phrase?

- A. novelty
- B. immutability
- C. exhaustiveness
- D. pervasiveness

Question 5

Source PDF page: 23

The following text is from Yung Wing's 1909 memoir *My Life in China and America*. "Yung Wing was the first person from China to graduate from a US university. Little did I realize when in 1845 I wrote, while in_ the Morrison School, a 'composition on "An Imaginary Voyage to New York and up the Hudsor was to see New York in reality, This incident leads me to the reflection that sometimes our imagination foreshadows what lies uppermost in our minds and hat I brings possibilities within the sphere of realities. Which choice best describes the function of the underlined sentence in the text as a whole? A. It foreshadows Yung's eventual success as a writer. B. It indicates Yung's unwillingness to distinguish between reality and fantasy as a child C. It illustrates the sense of adventure that Yung developed as a child. The following text is from Jerome K. Jerome's 1889 novel *Three Men in a Boat (To Say Nothing of the Dog)*. The narrator and two friends are taking a boat down the River Thames in England. In a boat, I have always noticed that it is the fixed idea of each member of the crew that he is doing everything. Harris's notion was, that it was he alone who had_ been working, and that both George and_1had been imposing upon_him, George, on the other hand, ridiculed the idea of Harris's having done anything 'more than eat and sleep, and had a cast-iron opinion that it was he - George himself - who had done all the labour worth speaking of, Which choice best describes the function of the underlined sentence in the text as a whole? A. It establishes Harris's feelings about the narrator's idea of how boat trips usually proceed. B. It offers Harris's belief as a specific example of a trend the narrator has observed while boating, C. It suggests that Harris is focused on helping the group navigate a challenge. D. It demonstrates that Harris finds his experiences on the boat to be confusing. Driven (o sell as many paintings as possible, Alfred Hair, an influential figure among the landscape artists known as the Florida Highwaymen, pioneered "fast painting," a technique (which in part involved swift applications of paint) that many Highwaymen, including Livingston Roberts, adopted. To conclude that this approach accounts for the ethereal but inaccurate, as Hair's methods weren't universally practiced by _his affiliates: George Buckner, for example, painted with greater deliberateness but achieved the ualitics now synonymous with the Highwaymen aesthetic is tempting same

effects Which choice best describes the function of the underlined portion in the text as a whole? A. It details evidence that contradicts a claim mentioned earlier in the text about a long-standing disagreement within a group of artist. B. It considers and rebuts an interpretation of the effect of a painting technique 'mentioned earlier in the text on the perception of work by a group of artists, C. It establishes a contrast between the aesthetic qualities of works by artis were central to a movement introduced carlier in the text and those of an artist who ts who 'was more peripheral to that movement. D. It explains how an artist mentioned earlier in the text developed a distinctive style by adapting a particular approach to painting originated by his colleagues, Studies of ocean wave breaking have predominantly focused on traveling waves (those propagating along the horizontal plane), so Mark McAllister et al. utilized a circular wave tank to produce and study spike waves, axisymmetric standing waves that can erupt verti ly when traveling waves prop: ating in opposing di inter Traveling waves break when wav ngth ratio) passes a critical threshold; breaking thus constrains wave height. MeAllister et al, found that spike waves can exceed that constraint, as other factors than just steepness (e.g., jet stability and cavity shape) mediate spike-wave breaking Which choice best states the main idea of the text? 'A. MeAllister et al, suggest that spike waves can form when traveling waves propagating in opp than traveling waves. B, The process of breaking limits the height of traveling waves, but the study by McAllister et al. suggests that spike waves can exceed those limits if their height-to-length ratio reaches a critical threshold. sing directions intersect and that spike waves tend to be higher C. The study by McAllister et al. suggests that when traveling waves intersect in specific ways, the resulting wave may be higher than would be expected based on the properties of traveling waves. D. Previous studies have suggested that steepness mediates breaking in traveling waves, but the study by MeAllister etal, shows that jet stability and cavity shape may also influence breaking in such waves. Optimal foraging theory (OFT) holds that animals' foraging behaviors refl cost-benefi trade-offs that vary by species and with dynamic ecological circumstances. One such circumstance is lunar intensity, which Joel Brown and colleagu found to be negatively associated with foraging by Arizona pocket but Patricia C, Wright found to be positively associated with foraging by three-striped night monkeys. This discrepancy is explicable in terms of OFT: the monkeys' greater reliance on vision means that higher lunar intensity benefits them more than it benefits the mice. Which choice best describes the finding made by Wright, as presented in the text? 'A. Daring periods of high lunar intensity, three-striped night monkeys increase their reliance on vision, B. As lunar intensity increases, Arizona pocket mice reduce their foraging activity. C. As lunar intensity inereases, three-striped night monkeys increase their foraging activity. D. Increased lunar intensity is more beneficial for three-striped ht monkeys than it is for Arizona pocket mice. Nautilids are marine mollusks that begin growing their shells before emerging from their eggs and continue to add shell segments throughout their lifetimes. The walls between their shells' chambers are called septa, and the deeper the water in which a septum forms, the greater the concentration of the isotope oxygen-18 th :plum will contain, Since temperature falls as depth inereases, if the area of ocean a nautilid inhabits is known, this isotopic signature can reveal the temperature at which its septa, formed, Paleontologist Amane Tajika and colleagues examined each of the septa in 'two nautilid shells and concluded that septum sample M23 formed at a temperature of

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 14

Source PDF page: 28

0°C whereas sample F02 formed at 20.8°C. Which finding, if tue, would most directly weaken the researchers' conclusion? 'A. At a depth of 140 meters in the nautilids' habitat, the water is 20.8°C and the concentration of oxygen-18 is equal to that in sample FO2. B, The concentration of oxygen-18 in FO2 is higher than that in M23. C. The concentration of oxygen-18 in F02 is lower than that in M23. D. At a depth of 385 meters in the nautilids" ha er is 14.0°C and the concentration of oxygen-18 is equal to that in sample M23. i, the In Ding (Navajo) culture, ikaah (sandpaintings) are created and then erased as part of sacred healing ceremonies lasting no more than a few days, but Diné hataatié(chanter; healer; cultural guide) Fred Stevens developed fixatives to preserve desacralized sandpaintings. While on a US-sponsored cultural ambassadorial trip in Europe and the Americas in the 1960s, Stevens produced sal such sandpaintings and gave them to cultural institutions. This may seem in tension with the role of cultural ambassador - how could static objects authentically represent an inherently ephemeral and dynamic practice? - but such a view is itself overly object-focused and neglects how Stevens, strove to convey exactly those characteristics of ikaah as a cultural practice. Which quotation from an art historian would most drectly support the claim made in the text? 'A. "Stevens's ambassadorial sandpaintings are best understood not as self-contained objects but as reminders of the public creations of the sandpaintings, during which Stevens conducted appropriate 'Aaah rituals and encouraged viewers to closely track the sand throughout the process, B, "While Stevens's ambassadorial sandpaintings are undoubtedly educative for his movements and subtle shift audiences that have little exposure to Diné culture, they should not be confused with authentic

ikaah, which cannot be extricated from a practice that is intentionally and necessarily transitory nor condensed into a single persistent object." C. "The most compelling way to reconcile the apparent tension between the temporary and performative nature of ikaah and the persistent and static nature of Stevens's ambassadorial sandpaintings is to recognize that Stevens was an ambassador not only of Diné culture but of a US art culture that tended to value permanent works over ephemeral ones." performative role - of the sandpaintings, for by taking those actions, Stevens publicly enacted the transmission of knowledge of both traditional rkaah practices and cutting-edge chemistry (in the form of the preservative additives), a hybrid that It is important to recall Stevens's own actions as a gift-giver - a temporary and reflects the dynamism of Diné culture.

A. [choice text not detected]

B. [choice text not detected]

C. [choice text not detected]

D. [choice text not detected]

Question 2

spider attacks | spider attacks Cape type the spiders | on termites with | on termites with attacks on termites with black-and-white striped looked at first solid black | solid white capes capes capes solid black cape 60% 26% 13% 14% 86% 0% 25% 50% 25% stiped cape Some animals evade predation with the help of contrasting markings that signal toxicity. Lisa Taylor and team studied how jumping spiders behave toward termites (their regular prey) to which solid black, solid white, or black-and-white striped (i.e., contrasting) capes were affixed. Each spider was placed in a el ar container in the center of a circular dish in which six termites, two with each of the thre pe types, could be seen, Noting which termites the spiders first looked at and which termites they ultimately targeted, the researchers concluded that contrasting markings were a deterrent. Which choice best describes data from the table that support Taylor and team's conclusion? 'A. Half of the spiders that first looked at a termite wearing a black-and-white striped cape attacked a termite wearing a solid white cape, and the other half of those spiders, 'were just as likely to attack a termite wearing a black-and-white striped cape as they were to attack a termite wearing a solid black cape. B. For each type of cape, a majority of the spiders that first looked at a termite swearing that type of cape attacked a termite wearing that same type of cape. C. Regardless of the type of cape worn by termites the spiders first looked at, the lange majority of spider attacks were on termites wearing solid-color eapes. D. None of the spiders that first looked at a termite wearing a solid white cape attacked a termite wearing a black-and-white striped cape. Rafael Níiez and colleagues studied how members of the Yupno, an Indigenous group in Papua New Guinea, conceptualize time in both spoken language and gestures, The researchers recorded Yupno speakers explaining certain temporal words and phrases, such as omo-ropmo bilak, a pastoriented expression that translates to "a couple of years ago," and coded each speaker's manual gestures. Previous research has found a tendency in many cultures to make temporal distinctions along imagined linear axes: for instance, English speakers often refer to the front/back axis to describe events in time, Some researchers believe this tendency is universal, but Nitiez. and colleagues claim this is not the case. Which finding, if true, would most directly support Nuiiez and colleagues' claim? 'A. Yupno speakers typically use their left hand to make temporal of whether the gestures are past oriented or future oriented, B, Some Yupno grammatical structures used when talking about time are also used in English. C. Yupno speakers were observed making temporal gestures both indoors and tures regardless outdoors, though with greater frequency when indoors. D. Future-oriented gestures used by Yupno speakers do not, on average, point in the opposite linear direction of past-oriented gestures. Whistler waves are low-frequency plasma waves that on Earth are typically generated by lightning. Numerous recordings of whistler waves on Venus have led many scientists to suggest that the planet's atmosphere is host to extensive amounts of lightning, and, in fact, Venusian whistler waves have similar energy signatures to those of whistler wav; generated by lightning on Earth. The majority of Venusian whistler wave data come from two spacecraft mission s - the Pioneer Venus Orbiter (PVO) and the Venus Express (VEX) - which have included few observations of other phenomena consistent with lightning occurrences (such as flashes of light), leading other scientists to suggest that Which choice most logically completes the text? A. there are geophysical characteristics of Venus not shared with Earth that promote the generation of whistler waves, B, the purported Venusian whistler waves must actually be some other type of atmospheric activity than whistler waves. C. Venusian lightning has properties that make it unlikely to generate whistler waves D. simila ities in the energy signatures of Venusian and Earth whistler waves may reflect imprecisions in the PVO and VEX data. In the world's democracies, proportionally few elected representatives are young adults. While some philosophers argue that certain types of underrepresentation (of women, for example) are unfair in principle and should be remediated via quotas, there is broad agreement that youth underrepresentation is not inherently unfair since it is universal (all people are underrepresented when young), temporary (underrepresented young people become overrepresented older people), and reflective of a legitimate concern (lack of relevant experience). Accordingly, when philosopher Juliana Uhuru Bidadanure advocates for youth quotas for elected representatives, she does so on the basis of their instrumental value for promoting youth interests, arguing that Which

choice most logically completes the text?

- A. young adults may lack certain kinds of experience but those experiences are not relevant to the question of whether youth underrepresentation is fair in principle.
- B. age-related quotas would alleviate the inherently unfair overrepresentation of older people that tends to occur in the world's democracies,
- C. youth underrepresentation may be fair in principle but leads to worse outcomes for young adults than could be achieved with more proportionate youth representation.
- D. it does not matter that youth underrepresentation is universal, temporary, and reflective of a legitimate concern since it is inherently unfair.

Question 16

Multidisciplinary at its core, Which choice completes the text so that it conforms to the conventions of Standard English? 'A, Diné/Creek artist Anna Tsouhlarakis engages a range of art forms - primarily video, photography, and performance - in her body of work. B, video, photography, and performance are among the range of art forms that Diné/ Creek artist Anna Tsouhlarakis primarily engages in her body of work C. a range of art forms - primarily video, photography, and performance - are engaged by Diné/Creek artist Anna Tsouhlarakis in her body of work D. Diné/Creek artist Anna Tsouhlarakis's body of work engages a range of art forms - primarily video, photography, and performance. At the Chicxulub asteroid impact crater in Mexico, the presence of many fossilized microbacteria, which seem to have thrived there despite the extreme heat that persisted after the Chicxulub impact, claims that bacteria are among the planet's most resilient organisms. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. reinforce
- B. have reinforced
- C. reinforces
- D. are reinforcing

Question 20

Upper-atmospheric jets - phenomena whereby electrical discharges cause narrow cones of blue light to briefly burst upward from the tops of thunderclouds - have been observed reaching the ionosphere. The extreme altitudes involved (the ionosphere begins about 80 km above Earth) mark these gigantic jets as outliers; the majority of jets reach heights of only 20 to 50 km. Which choice completes the text with the most logical transition?

- A. consequently,
- B. indeed,
- C. in addition,
- D. nevertheless,

Question 25

Source PDF page: 38

While researching a topic, a student has taken the following notes: In musie theory, the term "key" refers to the set of musical notes that forms the foundation of a piece of music. + In Ideas Toward an Aesthetic of Music (1806), German poet and composer Christian 'Schubart describes the moods of various musical keys. He describes the key of C minor as expressing "longing. In Régles de Composition (1682), French composer Marc-Antoine Charpentier undertakes the same task, He describes the key of C minor as "obscure and sad." "Don't Speak" by No Doubt (1996) is a song written in C minor. 'The student wants to compare how Schubart and Charpentier describe the mood of C minor, Which choice most effectively uses relevant information from the notes to accomplish this goal? 'A. Schubart and Charpentier each undertook the task of describing the mood of various keys, including C minor, B. Schubart describes the mood of C minor as expressing "longing," while Charpentier describes it as "obscure and sad." C. The song "Don't Speak" by No Doubt is written in the key of C minor, the mood of 'which has been described as expressing "longing." D. The key of C minor is one of various keys, which are sets of musical notes that form the foundations of pieces of music, The Paralympic Games are a series of international sporting events involving athletes with an impairment. A gold medal indicates that an athlete finished in first place. 'Swimming has been an event at the Paralympics since 1960, swimmer from 1984 to 2004. Béatrice Hess competed as a Paralympi 'She won twenty-five medals. Of

these medals, twenty were gold Which choice most effectively uses information from the given sentences to emphasize how long Hess's sport has been a Paralympic event? 'A. An accomplished Paralympian with multiple gold medal wins, Béatrice Hess competed! as a swimmer from 1984 to 2004. B, Béatrice Hess competed at the Paralympic Games, a series of international sporting events. C. Swimming, a sport in which Béatrice Hess took home twenty gold medals, has been an event at the Paralympic Games since 1960. D. During her earcer in swimming, which started in 1984, Béatrice Hess took home a total of twenty-five medals, twenty of which were gold, While researching a topic, a student has taken the following notes: A.2022 study analyzed geotagged social media posts to assess the effect of parks on happiness in 25 US cities The happiness benefit of a city's parks was the numeric difference between the calculated happiness scores of posts made in parks and posts made elsewhere. A benefit above 0 indicates a positive effect. £0, C The park happiness benefit in San Francis fornia, was greater than 0.10. The park happiness benefit in Washington, DC, was greater than 0 but less than 0.10. The average happiness benefit of parks across all cities was 0.10. 'The student wants to make a generalization based on the study's findings. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Geotagged social media posts were analyzed for expressed happiness in both San Francisco and Washington
- B. Though it ean vary from city to city, the overall effect of parks on happiness is a positive one,
- C. San Francisco's parks had a positive effect on happiness, but this was not true of Washington's parks, had a below-average effect.
- D. By comparing the happiness scores of posts made in parks and posts made elsewhere, the study determined the effect of parks on happiness.
