Module 1

Question 1

Source PDF page: 2

The following text is from Rachel Heng's 2023 novel *The Great Reclamation*. Ah Boon is fishing off the coast of Singapore. more SAT preparation tips.)they contained only one kind of fish-black pomfrets, the flat diamonds of their bodies slick in the morning light. This uniformity did not surprise him; over the years, he'd learned that the waters here were temperamental. They could be relied upon for a good catch, but from time to time threw up only prawns or squid, and other times colorful varieties of fish that weren't even supposed to be found in this region. He'd grown to accept the unpredictability, embracing it as a game to be played, like the reading of tea leaves or the grooves of a palm. Taken together, the three underlined portions most clearly serve which function in the text as a whole?

- A. They illustrate the changeable nature of the fishing grounds where Ah Boon is.
- B. They underscore Ah Boon's lack of surprise at seeing sea creatures that aren't usually found in the region.
- C. They provide examples of what Ah Boon most frequently catches in the area.
- D. They emphasize the wide variety of sea creatures that Ah Boon has caught on this particular fishing trip. i

Question 2

Source PDF page: 3

When a landscape with native megafaunal (large-bodied) mammalian herbivores experiences a substantial decline in those populations, it loses a functional component of plant ecology. Introducing non-native proxy species has been beneficial in some such cases, but the reasonable concern persists that ecosystems may be negatively affected by species that didn't coevolve with local vegetation. Scholarly analysis of findings from 221 studies revealed no evidence that nativeness mediates the ecological effects of megafauna, however, determining instead that other traits, such as diet selectivity, are more germane. Which choice best states the function of the underlined portion in the text as a whole?

- A. It outlines the reasoning behind the claim about a benefit that is presented in the previous sentence.
- B. It presents an insight suggesting that a concern acknowledged as sensible earlier in the text is unsubstantiated.
- C. It explains why data do not show the expected pattern described at the beginning of the text.
- D. It identifies an inconclusive finding that motivated a shift in the focus of an analysis discussed in the text. eee

Question 3

Source PDF page: 4

strength as a measure of durability, overlooking other potentially relevant factors. Lisa Ptacek et al. therefore investigated the potential of gas permeability (vulnerability to incursion by gases), which is caused in part by excessive porosity, as a durability indicator. Their measurements and observations revealed that quality of conditions during the concrete curing phase negatively correlates with gas permeability and that high gas permeability values are associated with increased deterioration as concrete surfaces age. Information in the text best supports which statement about Ptacek et al.'s findings?

- A. They suggest that gas permeability testing presents a more reliable indication of
- B. They bolster the claim that concrete's susceptibility to damage decreases as its gas permeability increases.
- C. They call into question the idea that quality of curing conditions directly affects
- D. They indicate that evaluation of gas permeability is an appropriate addition to concrete quality assessment procedures.

Question 4

Source PDF page: 4

What is a city? The answer depends on where you live! Many countries define an area as a city based on how many people live there. However, not every country uses the same numbers. Albania defines a city as an area with a population of at least 400, while Greece defines a city as having a minimum population of 10,000. Some countries even define cities using other factors, like the number of buildings in the area. Which choice best states the main topic of the text?

- A. What some people enjoy about cities
- B. The number of small towns in Albania
- C. How different countries define what a city is
- D. The country of Greece / 4 Beare)

Question 5

Source PDF page: 5

Stores often play background music to create a pleasant shopping experience. Based on a survey, Amir Manzoor found that such music was linked to reduced enjoyment among customers. Manzoor thinks that one explanation for this result is that the surveyed customers may have wanted to finish their shopping as quickly as possible. They therefore weren't focused on enjoying the experience. It's possible that background music could improve the experience of other customers whose main goal is to have a good time while they shop. Based on the text, which research question was Manzoor's study most likely intended to answer?

- A. What genres of music do customers prefer to listen to while they are shopping?
- B. Does the volume of a store's background music affect how much time customers spend in the store?
- C. Do customers spend more money when shopping for music in stores or online?
- D. How does the use of background music in stores affect customers' shopping experience?

Question 6

Source PDF page: 5

Cane is a 1923 novel by Jean Toomer. In the novel, Toomer mentions a road in rural Georgia called Dixie Pike and describes it as having a deep connection to a faraway place, writing, Which quotation from Cane most effectively illustrates the claim?

- A. "And when the wind is from the South, soil of my homeland falls like a fertile shower upon the lean streets of [Washington, DC]."
- B. "The Dixie Pike has grown from a goat path in Africa."
- C. "From down the railroad track. the chug-chug of a gas engine announces that the repair gang is coming home."
- D. "One evening I walked up the [Dixie] Pike on purpose, and stopped to say hello [to Fern]."

Question 7

Monthly Temperatures and Wing Centroid Sizes of Fruit Fly Specimens
Average high | Average low
Average male ° Ave Tage female Month (°F) (F) wing centroid | wing centroid size (mm) size (mm)
[September [80 | 54] 8 T2207 Drosophila (fruit flies) have generation times of 10-12 days, so seasonal changes in humidity and other environmental conditions can drive seasonal fluctuations in chromosome rearrangements in species such as D. persimilis and D. subobscura. Drosophila body size (for which wing centroid size serves as a proxy measure) correlates with life span. Banu Sebnem Onder and Cansu Fidan Aksoy measured the wing sizes of members of a D. melanogaster population in Yesil6z, Turkey, that were collected monthly between May and October over three years. Their research suggests that Drosophila collected in relatively warmer months should tend to have a longer life span, as is illustrated by the finding that Which choice most effectively uses data from the table to complete the assertion?

- A. the average female wing centroid size was consistently larger than the average male wing centroid size in all four months in the table.
- B. the average male wing centroid size was larger in July than in October.
- C. the average female wing centroid size was 2.02 mm in July but was 2.27 mm in September.
- D. the average monthly low temperature was higher in September than in May.

Minimum and Maximum Depths of Stony Coral Species in Caribbean and Indo-Pacific Waters
Species Location Minimum Maximum depth (meters) depth (meters)
Acropora awi Indo- 5 Pacific Indophyllia Indo- 20 25 macassarensis Pacific Isophyllia rigida Scolymia cubensis
A marine biologist is researching four stony coral species in Caribbean and Indo-Pacific waters, focusing on sightings of these species in the shallow zone (less than 30 meters below the surface) and the mesophotic zone (30 to 150 meters below the surface). Consulting the table, she notes that the smallest maximum depth is located in Which choice most effectively uses data from the table to complete the statement?

- A. Indo-Pacific waters in the mesophotic zone
- B. Caribbean waters in the shallow zone.
- C. Caribbean waters in the mesophotic zone.
- D. Indo-Pacific waters in the shallow zone.

Question 9

Source PDF page: 8

Rafael Nufiez and colleagues studied how members of the Yupno, an Indigenous group in Papua New Guinea, conceptualize time in both spoken language and gestures. The researchers recorded Yupno speakers explaining certain temporal words and phrases, such as kalip bishap, (For additional SAT study materials, contact sat_1600. manual gestures. Previous research has found a tendency in many cultures to make temporal distinctions along imagined linear axes: for instance, Spanish speakers often refer to the left/right axis to describe events in time. Some researchers believe this tendency is universal, but Nufiez and colleagues claim this is not the case. Which finding, if true, would most directly support Nufiez and colleagues' claim?

- A. Yupno speakers typically use their left hand to make temporal gestures regardless of whether the gestures are east oriented or future oriented.
- B. Some Yupno grammatical structures used when talking about time are also used in Spanish.
- C. Future-oriented gestures used by Yupno speakers do not, on average, point in the opposite linear direction of past-oriented gestures.
- D. Yupno speakers were observed making temporal gestures both indoors and outdoors, though with greater frequency when indoors.

Question 10

Source PDF page: 8

Coffee farming around the world has changed greatly over time. Originally, coffee plants grew in the shade of tropical forests. Today coffee is often grown without shade cover. This is because full-sun coffee farms can produce more coffee beans. But the lack of trees on such farms means a lack of spaces for many species of birds to roost. Therefore, compared with full-sun coffee farms, shaded farms tend to . Which choice most logically completes the text?

- A. be home to a more diverse range of birds.
- B. have better soil quality.
- C. have fewer problems with insects and other pests.
- D. experience generally milder weather conditions

Question 11

Source PDF page: 9

Studies have shown that when we listen to high-tempo music (songs with a high number of beats per minute, or bpm) during endurance exercise, we perceive our effort as lower than it actually is, which leads to an increased pace and a higher heart rate. Researchers recently designed a follow-up study in which participants jogged outdoors for 30 minutes while listening to Aerosmith's "Livin' on the Edge" (169 bpm) continuously. The next day, participants performed the same activity while listening to Ella Fitzgerald's "From This Moment On" (93 bpm). As expected, listening to that song resulted in participants Which choice most logically completes the text?

- A. perceiving their effort as lower while jogging than they had the previous day.
- B. varying their jogging pace more than they had the previous day.
- C. exhibiting a higher average heart rate while jogging than they had the previous day.
- D. jogging a shorter distance in the 30 minutes than they had the previous day.

KCUW-LP is a Native-run radio station broadcasting from the Umatilla Indian Reservation in Oregon. In 2004, Loris Taylor wanted to make sure that stations like KCUW-LP continued to thrive. she founded Native Public Media, a support system for Native radio stations that now includes around sixty stations. Which choice completes the text with the most logical transition?

- A. Nevertheless,
- B. In reality,
- C. Thus,
- D. Conversely, ees ge sr ez eeee HEE

Question 19

Source PDF page: 13

In 1845, the United States District Court for the state of Iowa was established. Initially, the court's jurisdiction was a single district that encompassed the entire state, but as Iowa's population grew, this single district began to struggle to serve the needs of everyone in the state. the court's jurisdiction was subdivided into two districts, each with its own district court. Which choice completes the text with the most logical transition?

- A. Ultimately,
- B. For example,
- C. Nevertheless,
- D. Additionally,

Question 20

Source PDF page: 13

On a chilly spring morning in a Virginia park, as sunlight crested the treetops, Kathrin Swoboda raised her Nikon D500 camera and captured an image that would win the Grand Prize in the 2019 Audubon Photography Awards: a red-winged blackbird, exhaling what appeared to be rings of smoke. the "smoke" was actually the blackbird's breath hitting the cold morning air as the bird sang. Which choice completes the text with the most logical transition?

- A. Therefore,
- B. For example,
- C. Furthermore,
- D. Of course,

Question 21

Source PDF page: 14

Vanadium is one of a variety of potentially useful trace elements contained in the chemical-rich brine that remains after seawater is purified through desalination. However, routine extraction of vanadium and other such elements from brine is not yet technologically or economically feasible. most trace elements have only been extracted from seawater on an experimental basis. Which choice completes the text with the most logical transition?

- A. To date,
- B. In doing so,
- C. Finally,
- D. Similarly, 4 eeeeeesesFssssY i ge ur oz cene HER iOes meets

Question 22

Source PDF page: 15

®@The Highpointers Club is a hiking club. @One of the main goals among club members is to reach the highest points in all fifty US states.(Reach sat_6688 in wechat to receive more resources.) @Those who achieve this are called 50 Completers. @In Suk Han became a 50 Completer on November 15, 2013. ®@The highest point in Wisconsin is Timms Hill, at 1,951 ft. ®@The highest point in Wyoming is Gannett Peak, at 13,809 ft. Which choice most effectively uses information from the given sentences to explain the 50 Completers hiking challenge to a new audience?

- A. If you are looking for a new hiking challenge, consider joining the Highpointers Club, as did In Suk Han, a hiker who successfully reached the highest point in every US state.
- B. Not until after you have reached the highest points in all fifty US states-including Timms Hill in Wisconsin and Gannett Peak in Wyoming-can you include yourself among the 50 Completers of the Highpointers Club.
- C. On November 15, 2013, In Suk Han finally completed the feat of reaching the highest point in all fifty US states, including Timms Hill in Wisconsin and Gannett Peak in Wyoming.
- D. Hikers aiming to count themselves among the 50 Completers must reach not only West Virginia's Spruce Knob but also the even higher peak of Mount Elbert in Colorado. eee] DEFER ' ;

Question 23

Source PDF page: 16

While researching a topic, a student has taken the following notes: @ The Incarnations (2015) is an epistolary novel by English author Susan Barker. @Epistolary novels are novels written primarily as a series of fictional documents. @These documents can be letters, journal entries, newspaper clippings, and more. @@ The Incarnations consists primarily of letters. @The letters are sent between a taxi driver named Wang Jun and a mysterious woman. The student wants to provide an example of an epistolary novel. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. In 2015, English author Susan Barker published a novel of letters sent between a taxi driver named Wang Jun and a mysterious woman.
- B. Consisting primarily of letters sent between a taxi driver named Wang Jun and a mysterious woman, Susan Barker's The Incarnations is an epistolary novel.
- C. It was Susan Barker who published the novel The Incarnations in 2015.
- D. An epistolary novel is a novel written primarily as a series of fictional documents, such as letters, journal entries, or newspaper clippings. i ET Te | im)DEFEN SA y

Question 24

Source PDF page: 17

While researching a topic, a student has taken the following notes: @A synthesis reaction is a type of chemical reaction. @In a synthesis reaction, two or more substances combine to form a new substance. @When sodium and chloride combine, they form a substance called sodium chloride. @@This substance is more commonly known as table salt. The student wants to define the term "synthesis reaction." Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. A synthesis reaction is a chemical reaction in which two or more substances combine to form a new substance.
- B. A new substance is formed when a chemical reaction combines sodium and chloride.
- C. The substance sodium chloride, also known as table salt, is formed by a chemical reaction.
- D. When sodium and chloride combine, they form a substance commonly known as table salt.] DEFER ' ;

Question 25

Source PDF page: 18

While researching a topic, a student has taken the following notes: ®Documentary TV programs in the slow TV genre consist of uninterrupted broadcasts of ordinary events in real time. @MORA: Zeichner is a German slow TV program. ®@The 45-minute-long program documented an artist making a pencil drawing during a train journey. @It first aired in 2016. @Slow TV has been called "the world's most boring television." @ American journalist Nathan Heller praises it, writing that "it affords a visceral kind of armchair tourism." The student wants to use a quotation to refute the claim that slow TV programs are boring. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. With broadcasts of ordinary events, like artists at work, occurring in real time, slow TV just might be "the world's most boring television."
- B. Far from boring, slow TV programs can provide a "visceral kind of armchair tourism," as Heller puts it, whereby viewers can watch artists at work in real time.
- C. MORA: Zeichner can afford a "visceral kind of armchair tourism," as Heller puts it.
- D. While some have praised slow TV for affording "a visceral kind of armchair tourism," others have called it "the world's most boring television" 2 \$\$ -- | BED SATO SSSAARH een

As a defense mechanism, the monarch butterfly toxic compounds from milkweed plants. On ingesting a piece of milkweed, the monarch selectively absorbs toxic cardenolides from the plant in its gut and stores them in the tissues throughout its body, rendering the butterfly unpalatable to predators. Which choice completes the text with the most logical and precise word or phrase?

- A. neutralizes
- B. exploits
- C. impedes
- D. secretes a Ee |

Question 4

Source PDF page: 20

The synthesis of novel superheavy elements, such as moscovium (Mc), has led theorists to consider the feasibility of synthesizing all possible chemical compounds. In 2022, Guillermo Restrepo calculated the historical rates at which newly discovered compounds have entered the scientific literature, expanding the "chemical space." Using a conservative estimate of the number of viable compounds and assuming a doubling of the historical pace of discovery, (Visit the HDF website at <https://www.hdfedu.com/> to access all SAT past papers and free mock exams.) Restrepo found that under these hypothetical conditions, all potential compounds could be synthesized and documented. by 2050. Which choice best describes the function of the underlined portion in the text as a whole?

- A. It makes a comparison between the past and current rates at which new chemical compounds have entered the scientific literature.
- B. It emphasizes the point implicitly made earlier in the text that human inefficiency is the primary constraint on the expansion of the chemical space.
- C. It provides details about the qualification later in the sentence regarding the prospect of cataloging the full range of possible chemical compounds.
- D. It introduces information that helps explain why the synthesis of superheavy elements has rapidly expanded the chemical space. ey

Question 5

Source PDF page: 21

Guadalupe Romero Villanueva et al. conducted radiocarbon analysis of paint used in rock art at the Patagonian archaeological site Cueva Huenul 1, revealing that images of a comblike motif date to as early as 8,000 years ago, predating other paintings in the region by several millennia. The motif was subsequently reproduced multiple times at the site over the next 3,000 years, a period coinciding with extremely arid conditions and slightly negative population growth. The motif may therefore have functioned to help preserve cultural knowledge during a time of ecological and Which choice best describes the function of the underlined portion in the text as a whole?

- A. It emphasizes the historical conditions that explain why production of the painted motif described in the text abruptly ceased after 3,000 years of continue use.
- B. It provides context that informs the text's claim about why the peoples of Patagonia chose Cueva Huenul 1 as a culturally significant site.
- C. It explains the environmental circumstances that account for the rarity of rock art dating to the same period as the most discussed in the text.
- D. It identifies a consideration that factored into an interpretation of the rock art at Cueva Huenul 1 that is presented in the text. eee

Question 6

Source PDF page: 22

The following text is from Yung Wing's 1909 memoir *My Life in China and America*. Yung Wing was the first person from China to graduate from a US university. Little did I realize when in 1845 I wrote, while in the Morrison School, a composition on "An Imaginary Voyage to New York and up the Hudson," that I was to see New York in reality. This incident leads me to the reflection that sometimes our imagination foreshadows what lies uppermost in our minds and brings possibilities within the sphere of realities. Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It explains the origin of Yung's interest in writing.
- B. It indicates Yung's unwillingness to distinguish between reality and fantasy as a child
- C. It illustrates the sense of adventure that Yung developed as a child.
- D. It describes an event in Yung's life that exemplifies a phenomenon. a ET ee |

Question 7

Source PDF page: 23

One notable feature of Southern US literature is its adaptation of established fiction genres to Southern contexts. Mark Twain derived his episodic narrative structures and roguish heroes from the picaresque novel, and William Faulkner realized the decadent aristocrat, the imperiled heroine, and other character types of the Gothic novel as rural Southerners who were more contingent, more caught in the net of societal relations and history than the fantastical figures of the Gothic had been. Some of the region's poets, such as James Dickey, have shown even greater dexterity by adapting these sources in an altogether different literary form. The text suggests that some Southern poets have adapted established fiction genres in different literary forms with Southern contexts. Which quotation would best serve as an example of this adaptation in the work of James Dickey?

- A. "With its rural settings and rustic characters, Dickey's poems suggest the influence of the genre of pastoral action, yet Dickey may have instead obtained these elements from pastoral poetry, which preceded its namesake in fiction."
- B. "The Gothic genre emerged in England and Ireland in the 1700s and was later naturalized to the cultural landscape of the Northeastern US, as in the novels of Nathaniel Hawthorne, which Dickey had almost certainly read."
- C. "When Dickey invokes one genre of poetry and, within the space of a few lines, abandons it for another genre of poetry, what can we infer from this gesture if not the poet's fascination with genre per se, as well as his discomfort with it?"
- D. "What is the disturbed, and disturbing, speaker of Dickey's best poems if not a stock character of the Gothic novel, refracted through the speech and ethos of the South and conditioned by the structures of lyric poetry?" re

Question 8

Source PDF page: 24

Most Native languages belong to language families, or groups of languages whose similarities in vocabulary and grammar suggest shared descent from a single language (SAT preparation tips.) the language spoken by the Yana people in a mountainous area of Northern California was an isolate, or a language with no demonstrated relationship to other languages. Isolates are more prevalent in mountainous regions than elsewhere, likely because challenging terrain inhibits the geographical expansion of language families. Yet it is clear that geographical barriers on their own cannot fully explain this aspect of the distribution of Indigenous languages in California and elsewhere in the present-day United States. Which statement, if true, would most directly support the claim in the underlined sentence?

- A. Shoshone, a language in the Uto-Aztecan family, was originally spoken in a vast expanse of Idaho, Nevada, Oregon, and Wyoming—a region whose mountainousness rivals that of the homeland of the Yana people.
- B. In mountainous regions of the western US, isolate-speaking peoples historically met most of their food needs through foraging, hunting, and fishing rather than intensive farming.
- C. Although Native languages in non-mountainous areas of California tend to belong to language families, those families do not necessarily share common linguistic ancestry.
- D. Yana and other isolates spoken in mountainous regions of California tend to contain many more terms describing features of mountainous terrain than nonisolate languages from relatively flat regions of California do. re

Question 14

Source PDF page: 25

Studying animals in a laboratory allows variables to be systematically controlled, but removing animals from their wild habitats can affect their behavior and biology in unforeseen ways. Given this, biologists Rebecca M. Calisi-Rodriguez and George E. Bentley examined research on brown-throated three-toed sloths and white-throated sparrows to see whether results from studies in the wild were consistent with the results of studies in the laboratory. Therefore, data showing that brown-throated three-toed sloths tend to sleep fewer than 10 hours per day in the wild would be irrelevant to Calisi-Rodriguez and Bentley's investigation if Which choice most logically completes the text?

- A. they tend to sleep more than 15 hours per day in the lab.
- B. white-throated sparrows have low levels of corticosterone hormones outside of the breeding season in the wild.
- C. this behavior pattern has not been studied in the lab.
- D. such data have been collected for white-throated sparrows in laboratory settings but not in the wild.

Question 15

Source PDF page: 25

Born in Lyon, Mississippi, in 1902, musician Edward James "Son" House is best known as a key figure in the development of the Delta blues, a variant of blues that originated in the Mississippi Delta region. steeped in the fertile music scene that sprung up in the alluvial delta between the Mississippi and Yazoo Rivers, House and his peers developed their distinctive stripped-down, guitar-driven style. Which choice completes the text with the most logical transition?

- A. There,
- B. Thus,
- C. Nevertheless,
- D. Moreover, wba im)DEFEN SA y

Question 16

Source PDF page: 26

While researching a topic, a student has taken the following notes: @ Atsuto Suzuki is a Japanese particle physicist. @ Particle physicists study subatomic particles. @ Neutrinos are some of the least understood subatomic particles. @ Neutrinos were first discovered in the mid-twentieth century. Suzuki is known for his discovery of geoantineutrinos.(For additional SAT study materials, contact sat_1600.) The student wants to provide an example of a particle physicist whose research focuses on neutrinos. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. The research done on geoantineutrinos exemplifies the work particle physicists do to advance our understanding of subatomic particles.
- B. Neutrinos are a type of subatomic particle that particle physicists are still trying to understand.
- C. Particle physicist Atsuto Suzuki is known for his discovery of geoantineutrinos.
- D. By studying geoantineutrinos-to name just one example-particle physicists can learn more about neutrinos.
