Reading and Writing Module 1

Question 2

Source PDF page: 2

'The invertebrates *Haywardozoon pacificum* and *Trophomera mangand* have recently been discovered inhabiting the Clarion-Clipperton Zone (CCZ), an area of abyssal plain between Hawaii and Mexico where mining is permitted. The number of other invertebrates that may inhabit the CCZ is currently, as the area's biota is poorly sampled and the few samples that have been taken cannot be presumed to be representative, Which choice completes the text with the most logical and precise word or phrase? B. verifiable C. tenuous initiesimal D. inestimable

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 3

Source PDF page: 3

Given that healthy genetic diversity supports honey bee population robustness - a 'matter of public interest given the bees' crucial role as pollinators of many crops, such as watermelon - a study revealing a 'of diversity among US honey bees raised concern, though it also noted the potential to enhance the number of bees carrying several newly discovered genetic variants (e.g., A2-829-4-USA).. Which choice completes the text with the most logical and precise word or phrase? A. paucity B. redundancy . disparity D. repository Maryam Hosseini and her team used aerial images of well-mapped areas of Boston to train a computer program to identify sidewalks. When it was tested on images of Brooklyn, it 'identified sidewalks in the vast majority of eleven whether sidewalks were concrete or brick. Hosseini believes the program will improve on this already-strong performance as it gets used more Which choice completes the text with the most logical and precise word or phrase?

- A. clumsily
- B. reliably
- C. rarely
- D. slowly senseless

Question 5

Source PDF page: 4

'The Polynesian languages, a group of related languages originating on islands in the Pacific typically have array of consonant sounds, For example, the 'Tokelauan language of the South Pacific has eleven consonants, and 'Olelo Hawaii the language of the Native Hawaiian people, has eight. Globally, however, the median 'number of consonants per language is over twenty, Which choice completes the text with the most logical and precise word or phrase? A. a musical Ban unvarying Can exclusive D. a modest

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 6

Source PDF page: 4

Movies that are part of larger franchises are often criticized for being predictable. Take, for instance, *Spider Man: Far From Home* (2019), which is part of the Marvel Cinematic Universe franchise. It's true that this movie resembles earlier movies, But just because it has familiar elements doesn't mean it can't also be worth watching. Critics generally agree that *Spider Man: Far From Home* isn't the most exciting franchise movie, but franchise

movies are rarely as stale as some people claim, And some franchise movies, like Logan (2017), are wonderfully 0 Which choice best describes the overall structure of the text?

- A. The text summarizes the plot of a franchise movie continued in a later movie in that franchise.
- B. The text explains why some people enjoyed a particular franchise movie, then considers why other people disliked it then explains how the plot is
- C. The text describes audiences' reactions to a movie that is part of a larger franchise, then presents some critics' reactions to that movie,
- D. The text discusses a common criticism of franchise movies, then argues that the criticism is mostly undeserved.

Question 1

Source PDF page: 5

'The following text is from Julia Alvarez's 2000 novel *In the Name of Salomé*. Salomé, a poet, is hosting guests in the front parlor of her family home, and Ramona is her sister: A salon is a social gathering for the exploration of intellectual ideas was evening when the women got up to leave. Tia Ana had already come into the room several times to see if these guests had departed yet. The front parlor had always been her special province, as she used it for her little school. Now, every evening, it turned into Salomé's salon, as Ramon: never in one for its transformation back to a classroom the following morning. (©2000 by Julia Alvarez Which choice best describes the function of the reference to the parlor as Tia Ana's "special province" A It reveals that Tia Ana feels as if Salomé has betrayed her trust by allowing guests into space she considers her own, B. It indicates the joy that Tia Ana feels when she uses her classroom for varying purposes, C. It characterizes the room as a place where Tia Ana can escape social pressures, D. It introduces an idea that helps explain Tia Ana's apparent eagerness for Salomé's return. Text 1 Despite how the Indian dish *madras* differs from Mauritius's *gato pima*, both dishes are described as a "curry." The word's history, however, is fraught. It's a term created by British and Portuguese colonizers to refer to the myriad spiced sauces with ties to the Indian subcontinent, In 1973, chef Madhur Jaffrey dismissed the term "curry" as inaccurate, and in 2021 blogger Nisha VEDI Pawar suggested that people abandon the term both for its colonial origin and for its failure to grasp the intricacies of India's Text 2 Growing up in India, chef Chintan Pandya didn't encounter the term "curry" often: his family didn't cook curries, but some of his neighbors did, Although the blanket use of the term is rooted in colonialism, Pandya calls some of his dishes curries. Having traveled throughout India as part of his training, he came to appreciate the country's diverse cuisines and the diverse uses of the term "curry. Text 1 and Text 2 present points of view about which topic? A. The history about the peoples on the Indian subcontinent B. The use of the term "curry" C. The difference between *madras* and *gato pima* D. The best method for studying a region's cuisine

1 on sansreusesnna Sl Sandra Cisneros's English-language short story "Eyes of Zapata" occasionally includes words and phrases from the Mexican dialect of Spanish, While the story doesn't translate the Spanish text into English, the meaning can be inferred from the surrounding English text. Ang Castillo adopts a comparable approach to Spanish in her English language novel *So Far from God*. Both works thus remain accessible to all readers of English, not just those who can also read Spanish. What is the main topic of the text?

- A. The difficulty of translating Sandra Cisneros's works into languages other than English
- B. The commercial success of English-language literature around the world
- C. The enduring popularity of Ana Castillo's works in Mexico
- D. The use of non-English vocabulary in two English-language literary works

Question 10

Source PDF page: 7

In a large community science effort, biologist Grace Herzl and colleagues, collaborated with hundreds of students and other amateur science enthusiasts for more than three years to study how butterfly color behavior, They found that butterfly color might influence behavior more than butterfly size does, and that butterflies tended to prefer orange and red flowers on cloudy days and weather conditions relate to butterfly color and multicolor flowers on partly cloudy days. Which choice best states the main idea of the text?

- A. Collaboration between professional scientists and members of the public is especially useful when studying the behavior of butterflies and other flying insects.
- B. A recent study suggested that butterflies' coloring seems to be less relevant to their behavior than weather conditions
- C. Weather conditions and butterfly color seem to have less influence on butterfly behavior than the location where the butterflies are studied does. D. A large study suggested that butterfly color and weather conditions might influence the behavior of certain butterflies. 8 on sansreusesnna Sl Uncle Boonmee Who Can Recall His Past Lives (2010) and other films by Thai director Apichatpong Weerasethakul are contributions to slow cinema, an art house genre whose contemplative pacing and deprivileging of narrative are further exemplified by films such as Andrei Tarkovsky's *Solaris* (1972). Apichatpong describes his films as sleep inducing, which might suggest that they bore their audiences, but boredom does not necessarily cause sleep: in the absence of a goal to which one attaches attention and interest, the tension of boredom can be

am) inducing rather than soporific. Thus, Apichatpong's description of his films is not self-precatory; rather, his work invites sleep and thereby strips the description of its negative connotation. Which choice best states the main idea of the text? 'A. Audiences will fail to enjoy both *Solaris* and *Uncle Boonmee Who Can Recall His Past Lives* if they confuse sleepiness with boredom. B. Slow-cinema films can relieve anxiety for those who embrace the languid pace, but the films increase anxiety for those experiencing boredom as a result of the lack of cohesive narrative. . *Solaris* and many other slow cinema films often induce anxiety in their audiences « due to their measured pace, but films by Apichatpong do not, despite possessing other traits characteristic of the genre

D. It would be a misunderstanding to interpret Apichatpong's reflection on his work as a confession of its failure, because the effects his films produce on audiences are intentional

Question 12

Source PDF page: 9

'Total Areas of Five Pueblo Nations in New Mexico'

Pueblo	Area (square miles)
Acoma	595.7
Taos Pueblo	156.2
Pueblo of Sandia	38.9
Pueblo de Cochiti	82.1
Pueblo of Pojoaque	21.4

The Pueblo of Laguna is the largest of the nineteen Pueblo tribal nations in New Mexico, covering nearly 500 square miles. Most Pueblo tribal nations are much smaller. For example, the total area of Pueblo of Sandia is 38.9 square miles, and the total area of Pueblo de Cochiti is 82.1 square miles. Which choice most effectively uses data from the table to complete the statement? | A, 156.2 square miles | B, 595.7 square miles. C. 82.1 square miles, D. 21.4 square miles.

BRASER'S RESEARCH: Volcanoes in Ecuador

Volcano Type	Location	Year of Last Eruption
Caldera	Tibabura	5550 BCE
Compound	Chimborazo	350 BCE
Stratovolcano	Fernandina	2020
Shield	Imbabura	14,423

A student who is researching volcanoes in Ecuador notes that the country is home to different types of volcanoes. For example, 'Which choice most effectively uses information from the table to complete the example? B, Chimborazo is a caldera volcano, and Imbabura is a stratovolcano, C. Imbabura is a compound volcano, and Chacana is a shield volcano, D. Fernandina is a shield volcano, and Chimborazo is a stratovolcano.

14,423 FB OM1-14 Anne Brontë's 1847 novel *Agnes Grey* contains elements drawn from Brontë's own life: there are many parallels between the experiences of the novel's title character and those of Brontë, and as a result *Agnes Grey* is regularly described as an autobiographical novel. This characterization can be useful, but it also presents drawbacks in terms of how the work is perceived, as it may lead readers to believe that Brontë merely fictionalized true events, which, in an artistic field where creativity and inventiveness are prized, may suggest that Which choice most logically completes the text? A) *Agnes Grey* is less of an imaginative achievement than it actually is.) the real-world counterparts of other characters in *Agnes Grey* are hard to identify ©) Brontë should not have claimed that *Agnes Grey* is based on real events, D) critics disagree about whether *Agnes Grey* shows greater originality than works without autobiographical elements.

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 15

Source PDF page: 11

uniform color is mainly red, won more than half of Manchester United Football Club, whose home matches between 1947 and 2003. This is a higher proportion of home matches than Hull City Association Football Club, whose home uniform color is not red, won during the same period. According to a study by Martin J. Attili and colleagues, the color red can cause people to respond with fear and hesitation, which the researchers think helps explain Manchester United's success. Nadav Goldschmied and colleagues reanalyzed the published data from this study, however, and found no evidence that red-uniformed teams are more likely than other teams to win, suggesting that Manchester United's performance at its home stadium Which choice most logically completes the text?

- A. would probably have remained roughly the same if its players had not been 'wearing red uniforms.
- B. was likely influenced by its opponents' associations with the color red,
- C. was directly tied to its players' general satisfaction with their uniform color
- D. may have influenced other teams to change their uniform colors. see seasonsnnn Se

Question 16

Source PDF page: 12

London-based Nigerian sculptor Sokari Douglas Camp creates art by cutting, bending, and welding recycled metal materials into new and thought-provoking shapes. Her work - which has been featured in galleries around the world, such as the Potters Field Commission for Southwark Council in London and Skidmore College's Tang Teaching Museum and Art Gallery in New York - often references at least one of

several the environment, and Kalabari culture. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. themes; movement,
- B. themes, Movement,
- C. themes movement,
- D. themes: movement,

Question 17

Source PDF page: 12

Drummer Dennis Chambers's distinguished career includes many memorable tracks. His Brothers' album *Return of the B-Real Sugar Hill* is a pioneer of early hip hop _____. Chambers joined too late to play the song "Rapper's Delight." His achievements, such as working on the B-Real Brothers, However, as house drummer for, a record label that was a drums on the label's. Which choice completes the text so that it conforms to the conventions of Standard, English?

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 18

Source PDF page: 13

Blaise Pascal's Pascaline device - conceived, like William Oughtred's earlier Circular Slide Rule, amid the seventeenth century push to replace manual calculations 'with faster and more accurate machine-based methods - among the first, reproducible calculating machines. Which choice completes the text so that it conforms to the conventions of Standard English? A, being B, were C, was D, are

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 19

Source PDF page: 13

When a soil is classified using the International Union of Soil Sciences' system, its similarity to each of the 32 soil reference groups - defined by several criteria - is evaluated, one group at a time, until a match is found. The comparisons are made in a specific order: thus, the criteria for *lixisols* (soils with clay-rich subsoil) are applied if the soil doesn't meet the criteria for *ferralsols*. Which choice completes the text so that it conforms to the conventions of Standard, English? A. have been B. are C. was D. were

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 20

Source PDF page: 14

Enacted in 1944, Iceland's constitution, according to legal scholars, contains one of the six constitutional features that enhance judicial independence. Explicit provisions for judicial independence. Melton and Ginsburg's research explains, are more likely to be found in constitutions enacted after 1985. Which choice completes the text so that it conforms to the conventions of Standard English?

- A. researchers James Melton

B. researchers, James Melton and Tom

C. researchers James Melton and Tom Ginsburg, 21, #h 23 463 A M1-21 'Though Middle English language was rarely employed in literature until poet Geoffrey Chaucer helped pioneer its literary use. his manuscripts contain the first documented uses of over 2,000 The Squire's Tale™ - h 'was widely spoken in fourteenth-century England, the lish words - like the word "exaltation" in his 1386 poet led a contemporary to dub him "the first finder of our far language." Which choice completes the text with the most logical transition? A) However, B) That ©) Be D) Indeed, Amruta Yelamanchili has worked at NASA's famed Jet Propulsion Laboratory (JPL), one of the world's leading facilities for robotic space exploration, ___ Yelamanchili 'worked as a data scientist on the JPL's Mars 2020 Perseverance rover team, which improved upon the 2011 Curiosity rover design by adding a drilling drill to the robot that could collect rock samples for later analysis, Which choice completes the text with the most logical transition? A. Specifically, B, Conversely, C. Finally,

D. Nevertheless,

Question 23

- C. [choice text not detected]
- D. [choice text not detected]

Question 1

Source PDF page: 23

In Bhutan, use of solid fuel (wood, coal) as a share of total household fuel use fell by approximately two thirds between 2000 and 2019; such shifts are often explained by the energy ladder, a model holding that fuel choice is mediated mainly by household income (specifically, high technology fuels displace solid fuels as incomes rise), Rasmus Heltberg's study of fuel use in Nepal shows this model to be reductive, however; household fuel use was heterogeneous, flexible, and influenced by several factors, including the stability of the local electrical grid. Which choice best describes the main purpose of the text?

- A. To challenge a common explanation for households fuel choices

- B. To contrast patterns in household fuel use in two countries
- C. To account for the effect of fuel use on household income
- D. To critique a frequently used model of changes in household fuel prices

Question 8

Source PDF page: 24

'The following text is from George Eliot's 1857 short story "The Sad Fortunes of the Rev. Amos Barton," The Countess Czerlaski is a newcomer to the town of Milby. It is true, the Countess was a little vain, a little ambitious, a little selfish, a little shallow and frivolous, a little given to white lies, - But who considers such slight blemishes, such moral pimples as these, disqualifications for entering into the most respectable society! Indeed, the severest ladies in Milby would have been perfectly aware that she would have created no wide distinction between the Countess Czerlaski and themselves: and since it was clear there was a wide distinction - why it must lie in the possession of some virtues from which they were undeniably free. Which choice best states the main idea of the text? A. The residents of Milby had initially thought the Countess Czerlaski was mostly harmless. B. Although the Countess Czerlaski actively cultivates a sense of mystery about her, her background is less interesting than what many residents of Milby have been led to believe. C. Although the residents of Milby are generally thought to be hospitable, the Countess Czerlaski has committed many social blunders that have caused her to be viewed with suspicion, widely disliked. D. Some residents of Milby are determined to disapprove of the Countess Czerlaski, even though the reasons for their dislike are largely groundless.

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 9

Source PDF page: 25

'Some researchers posit that species on the South Pacific island of Grande Terre are the surviving members of clades that inhabited other islands in the region before the complete emergence of Grande Terre 37 million years ago. In a 2012 study, however, Hervé Sauquet et al. found that the crown age (the age of the most recent common ancestor) of the clade of southern beeches on Grande Terre is 164 million years; Sauquet et al. further found that the crown age ancestor of all living and extinct species in the clade of southern beeches in the South Pacific generally is also approximately 164 million years. [As presented in the text, the findings of Sauquet et al. best support which statement?]

- A. The southern beeches found on Grande terre are members of a clade that likely originated outside the South Pacific.
- B. The most recent common ancestor of the southern beeches found on Grande Terre lived at least 37 million years ago.
- C. The southern beeches found on Grande Terre are not members of a clade that existed before the island completely emerged.
- D. The ancestors of most species found on Grande Terre arrived on the island earlier than did the most recent common ancestor of the island's southern beeches.

Question 2

Source PDF page: 26

Periods of subfreezing temperatures in Alaska have been growing shorter as a result of climate changes, potentially enabling increased carbon dioxide (CO₂) absorption through greater productivity of seabed wintergreen (*Orthilia secunda*) plants and other vegetation, but also potentially enabling increased CO₂-output through greater heterotrophic respiration (CO₂ generated by the activity of soil microorganisms). Hydrologist Yonghong Yi and her colleagues developed a model incorporating numerous inputs - years of soil moisture and snow cover data among them - to test the effects of climate changes on the CO₂ balance in Alaska, concluding that seasonal snow cover arrives earlier relative to the onset of soil surface freezing. Which finding, if true, would most directly support the researchers' conclusion? A. Relative growth of plant species such as *O. secunda* and lower rates of heterotrophic respiration under early snow cover reduce the amount of soil moisture available for the respiration. B. The soil insulation provided by snow cover enables heterotrophic respiration to continue during a period in which plant species such as *O. secunda* are typically not growing. C. The effect of soil moisture on the growth of vegetation and on the rate of heterotrophic respiration is stronger during the period of seasonal snow cover than during the period without snow cover. D. Seasonal snow cover tends to persist longer in areas of relatively low vegetation growth and high heterotrophic respiration than in areas of relatively high vegetation growth and low heterotrophic respiration.

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 10

Source PDF page: 26

A student is writing a research paper on the history of irrigation in the southwestern United States, situating the development of Lake Sabrina (a man-made body of water created in Inyo County, California, in 1908) in a larger historical context. The student claims that some modern-day irrigation methods used in southwestern states, such as California, Arizona, and New Mexico, have a lineage that long predates the completion of Lake Sabrina. Which quotation from a historian best supports the student's claim? A. "Sprinkler irrigation systems, which were developed in the late 20th century, are a convenient technique of irrigating that makes use of machinery in order to spray water in all directions. Many areas of the Southwestern United States are currently irrigated by this method." B. "In the decades following the Second World War, irrigation of arid areas for agriculture increased to such a degree that it now accounts for roughly 70% of the world's water usage. The irrigation system developed by the Hohokam people in what is now central Arizona in the 6th century CE was simple but made use of hydraulic engineering, design principles that are still utilized by today's engineers." C. "The importance of the development of irrigation infrastructure in the American Southwest today cannot be overstated, since it is the most common means of conveying water for food production."

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

Question 12

Annual Number of Forest Patches for Three Land Use Capability Classes in the Choroteza Region, Costa Rica 1960 1979 1986 2000 Year
 Class VI (severe limitations on use for crops) Class VII (very severe limitations on use for crops) Class VIII (cannot be used for commercial crops)
 "To understand the extent of deforestation in the Choroteza region of Costa Rica, Juan Pablo Arroyo Mora and colleagues used historical aerial photography and remote sensing data to track changes in the total number of forest patches in areas of different land use capability classes (categories that indicate possible uses of forest land). Due to the Choroteza region's accessibility, various types of forested areas were converted to cattle pasture as rising international meat prices drove a cattle ranching boom in the 1960s and 1970s; this conversion is evident in the graph. Which choice most effectively uses data from the graph to complete the assertion? A. high number of patches in class VI and class VII in 1986, B. difference between the number of patches in Class VII and in Class VI in 2000, C. increase in the number of patches for all classes from 1979 to 2000, D. decrease in the number of patches for all classes from 1960 to 1979, » Sars sasarensennam Sif 'Value, Cost, and Seigniorage of US Coins by Denomination, 2023 Total value of | Gross cost | Seigniorage | \$80" © Denomination | units produced (in | (in millions | (in millions of pennies! millions of dollars) | of dollars) | dollars) (totes) One-cent 414 174 "86.0 2.08 Five-cent 708 26 "13 "Ten-cent 266.6 4 047 Quarter 268.4 2644 304.0 053 Issuing a one- < dollar coin yields positive seigniorage - profit generated when the face value of a coin exceeds the unit cost of producing it - for Singapore's government, which can be used to fund such service education. Issuing coins can also result in negative seigniorage, however, and this phenomenon led Australia to stop producing certain coins. A student argues that it is in the financial interest of the United States to follow the example of Australia with regard to each of the four coins shown in the table. Which choice best describes data from the table that weaken the student's argument?

- A. Seigniorage per dollar issued was slightly greater for quarter-dollar coins than for ten-cent coins, but seigniorage in millions of dollars was much greater for quarter-dollar coins than for ten-cent coins,
 - B. Although issuing one-cent and five-cent coins resulted in negative seigniorage in millions of dollars, issuing quarter-dollar coins resulted in positive seigniorage in millions of dollars,
 - C. Issuing one-cent and five-cent coins created negative seigniorage in millions of dollars, but for each of those coins, the gross cost of issuing the coin was lower than the gross cost of issuing ten-cent or quarter-dollar coins was, D. Although issuing five-cent coins created the greatest negative seigniorage in millions of dollars, issuing one-cent coins created the greatest negative seigniorage per dollar issued
- 'Though longitudinal studies like the Northern Ireland Longitudinal Study (NILS), 'which has surveyed approximately 500,000 participants in Northern Ireland to find trends in public health, are expensive because they are conducted over many years, by spanning these time frames, they can reveal causal patterns. But studies for which 'cause and effect is not at issue, like a public opinion study that merely seeks to determine

the proportion of a city's population supports a particular tax proposal, « can succeed without longitudinal methods, which means that Which choice most logically completes the text? A. the public opinion study could likely be completed at a considerably lower cost than NCLS. B, longitudinal methods would likely be less suitable for studies in public opinion than for studies in public health, . longitudinal methods would likely be less expensive for studies in public opinion than for studies in public health

D. the results from NCLS would likely be more reliable than those from the public opinion study.

'The Virgin Group's introduction of the Virgin Atlantic airline in 1984 is an instance of brand extension - the company leveraged its brand recognition as a music retailer to enter a new product category. To investigate how market share affects consumers' likelihood of purchasing brand pairs (e.g., vacuum cleaner and microwave) in household purchasing data; for each pair, Grasby et al. calculated the branded products' market share and extensions, Alicia Grasby et al identified 30 extended the same brand of share and calculated the increase in probability of @ brand in one category to be purchased if the same brand was purchased in the other category. A broad inverse relationship between the two values emerged, which can most reasonably be attributed to the fact that Which choice most logically completes the text? A. the purchase probability of a brand is affected by the purchase probability of the particular product category to which it belongs, and thus brands in categories that are rarely purchased tend to have low purchase probabilities regardless of market share, B. as a brand's market share increases, the number of competing brands in the same product category tends to decrease, and thus the rate of increase in market share tends to accelerate as a brand's market share grows. C. brands with high market share have high purchase probability regardless of whether the other product in the pair is purchased and thus have less potential for increase in purchase probability than brands with low market share do. . consumers tend to be less familiar with brands with low market share than brands with high market share and thus may purchase both products in a pair with low market share without recognizing that the products are the same brand, D. savviness is not a factor

- A. [choice text not detected]
- B. [choice text not detected]
- C. [choice text not detected]
- D. [choice text not detected]

While researching a topic, a student has taken the following notes: + Hina Hanta is an online archive curated by the Choctaw Nation of Oklahoma, cultural artifacts + It features images of many people, + It features baskets, including a trunk basket (apushik pothioma in Choctaw) made from cane, + The trunk basket was made in 2019, +The archive features household items, including a stamp (sh tachunwa) made from wets relevant to the history of the Choctaw rubber, + The stamp was made in the 1800s. 'The student wants to support the claim that the online archive features both older and newer artifacts. Which choice most effectively uses relevant information from the notes to accomplish this goal? A. The

rubber stamp (ish inchumwa) was made in the 1800s, B. Hina Hanta, an online archive, features both basketry and household items. C. Not all artifacts in the Hina Hanta archive are from the 1800s, 1D, "The Hina Hants online archive features cultural artifacts both old and new including a rubber stamp from the 1800s and a cane trunk basket from 2019. 'While researching a topic, a student has taken the Following notes: + The Peloncillo-Pan Duro Mountains are located in northwestern Mexico. + They cover an area of 1,360 square miles (mi). + The Big Hatchet Mountains are located in the southwestern United States. + They cover an area of 65 mi + These mountain ranges are two of the dozens of sky island + Asky is from that of the surround in the southwestern and northwestern Mexico. it is an isolated mountain range whose environment differs from lowlands, ally 'The student wants to compare the sizes of the two mountain ranges. Which choice 'most effectively uses relevant information from the notes to accomplish this goal?" A. There are dozens of isolated mountain ranges located in the southwestern US and northwestern Mexico. B. In terms of area, the Peloncillo-Pan Duro Mountains (which cover 1,360 mi) are larger than the Big Hatchet Mountains (65 mi. C. Sky islands in northwestern Mexico and the southwestern US can vary in size D, The Peloncillo-Pan Duro Mountains and the Big Hatch Mountains are both isolated mountain ranges whose environments differ drastically from that of the surrounding lowlands, Ea Sars sasarennannam Sif 'While researching a topic, a student has taken the Following notes: + Bengali is a language in the Indo-Aryan language family. + In Bengali, a noun takes a different form when that noun functions as a locative sentence. + The Bengali noun bar? (house) is combined with the locative suffix-te to become the locative noun barite (in the house. + Danish is a language in the Germanic language family + In Danish, nouns do not change form to indicate location + In Bengali, nouns used as a Location must be indicated by prepositions such as J (in) or pa (on). The student wants to emphasize a difference between Bengali and Danish nouns. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. To indicate location in Bengali, a suffix is appended to a noun, but in Danish, the noun is unchanged and a preposition is used,
- B. Ben Indo-Aryan family, while the latter is @ Germanic language
- C. Though nouns in Bengali change form to indicate location, this Indo-Aryan language belongs to a different language family than Danish does.
- D. In Bengali, nouns take a different form when they function as a location, as the i and Danish belong to two distinct language families; the former is in the language belongs to the Indo-Aryan family; Danish, however, belongs to the Germanic family.

'While researching a topic, a student has taken the Following notes: + Lou Scheper-Berkenkamp was a painter and author born in Wesel, Germany. + She began attending the Bauhaus in 1920. + The Bauhaus was an influential German art and design school + The school famously espoused the design principle of "form follows function." + "Form follows function" means that an object's shape should be determined primarily by its intended purpose The student wants to explain the principle espoused by the Bauhaus, Which choice most effectively uses relevant information from the notes to accomplish this goal?"

- A. According to the Bauhaus, an object's intended purpose (Function) should primarily determine its shape (form).
- B. Lou Scheper-Berkenkamp was a painter and author who attended the Bauhaus, famous for espousing the principle of "form follows function."
- C. Famous for its principle of "form follows function," the Bauhaus was an influential German art and design school,
- D. An object's intended purpose and its shape are two elements of "form follows function," so of the design principle

Question 27

Source PDF page: 39

'While researching a topic, a student has taken the Following notes: "According to researcher Muhammad Rayan Fazal, "geothermal electric energy... [is] capable of producing more energy per megawatt per year as compared to similar capacity solar and wind power systems." + Geothermal power plants typically employ dry steam systems, flash steam systems, or binary cycle systems to produce electricity from high-temperature geothermal fluid, + The Platanares geothermal power plant in Honduras uses a binary cycle system, + Fazal says that binary cycle systems "pump 100% geothermal fluid back to the injection well, hence offering the least environmental impact with little or no emissions." The student wants to use a quotation from Fazal to explain an advantage of the geothermal system at the Platanares plant, Which choice most effectively uses relevant information from the notes to accomplish this goal?"

- A. Compared with dry steam systems and flash steam systems, the binary cycle system used at the Platanares plant is "capable of producing more energy per megawatt per year," Fazal notes.
- B. According to Fazal, because it uses high-temperature geothermal fluid to produce electricity, the system used at the Platanares plant results in "little or no emissions," making it environmentally friendly.
- C. Since they return all geothermal fluid to the injection well, binary cycle systems - such as the one at the Platanares plant - produce "the least environmental impact according to Fazal.

D. The Platanares plant uses a binary cycle system to produce electricity; in this type of geothermal system, fluid is pumped "back to the injection well," Fa * Sars sarensenannam Sif
